| (P) Seagrave and Olivier. (viii, 1889)                                                        | 272    | Motor driven by Liquid Hydrocarbon and. (P) Etève and Lallement. (ii, 1883)                       | 162      |
| (P) Vigreux. (i, 1883)                                                                        | 236    | Motors Actuated by Explosion of Liquid Fuels and. (P) Thompson. From Marcus. (ii, 1883)           | 161      |
| (P) Wells. From Verruc. (xii, 1893)                                                           | 136    | Nitrogen in the. (Boussingault.) (ii, 1883)                                                       | 159      |
| Apparatus for Delivering, into Gas Purifiers. (P) Newton. (x, 1891)                           | 532    | Obtaining Oxygen from:                                                                            |          |
| Apparatus for Determination of Carbon Dioxide in. (Petterson and Palmquist.) (vi, 1887)       | 749    | (P) Parkinson. (x, 1891)                                                                          | 947      |
| Apparatus for Enabling the Worker to Breathe in Noxious. (P) Ash. (xiii, 1894)                | 793    | (P) Longsdon. From Salomon. (x, 1891)                                                             | 270      |
| Apparatus for Extraction of Oxygen and Nitrogen from. (P) Brin. (viii, 1889)                  | 414    | Obtainment of Oxygen and Nitrogen from. (P) Brin. (v, 1886)                                       | 40       |
| App. for Filtering. (P) Capitaine. From Moeller. (iv, 1885)                                   | 197    | Of Dwellings, &c., Relation of, to Disease. (v, 1886)                                             | 543      |
| Apparatus for Heating. (P) Fudieker. (xiii, 1894)                                             | 1181   | Of Large Cities, Analysis of. (x, 1891)                                                           | 267      |
| Apparatus for Measuring and Delivering. (P) Thompson. From Tayler. (x, 1891)                  | 534    | Or Gases, Apparatus for Compressing and Expanding. (P) Windhausen. (viii, 1889)                   | 269      |
| Apparatus for Mixing Inflammable Gas with. (P) Smet-burst and Wade. (xii, 1893)               | 255    | Or Gases, Apparatus for Treating Substances with. (P) Peck. From Downton. (viii, 1889)            | 111      |
| Apparatus for Mixing with Gas or Vapour. (P) Vickers and Everett. (xi, 1892)                  | 424    | Poisonous Character of Expired. (Merkel.) (xii, 1893)                                             | 56       |
| Apparatus for Preparing Oxygenated. (P) Redfern. From Stamm. (iv, 1885)                       | 136    | Prep. of Nitrous Acid Vapours from. (P) Prim. (ii, 1883)                                          | 280      |
| App. for Prod. a Luminous State of. (P) Duffy. (xi, 1892)                                     | 619    | Production of Cold, by Expansion of Compressed. (P) Marcet and Ellis. (viii, 1889)                | 271      |
| Apparatus for Producing Oxygen and Nitrogen from. (P) Clark and Chapman. (viii, 1889)         | 46     | Production of Oxygen and Nitrogen from. (P) Chapman. (xii, 1893)                                  | 563      |
| App. for Prod. of Oxygen from. (P) Margis. (i, 1882)                                          | 338    | -Pump, A Mercurial:                                                                               |          |
| App. for Pumping. (P) Griffiths and Woolley. (xii, 1893)                                      | 254    | (Greiner and Friedrichs.) (vi, 1887)                                                              | 300      |
| App. for Purif. of. (P) Purcell and Purcell. (xi, 1892)                                       | 1025   | (P) Thompson. From Raps. (xi, 1892)                                                               | 60       |
| Apparatus for Saturating, with Hydrocarbon Vapour. (P) Scott. (ix, 1890)                      | 925    | -Pump for Use in Laboratories:                                                                    |          |
| App. for Saturating, with Vapours. (P) Banks. (xi, 1892)                                      | 508    | (P) Jeyes. (xii, 1893)                                                                            | 1058     |
| Apparatus for Separating Dust from:                                                           |        | (Kahlbaum.) (xiii, 1894)                                                                          | 760      |
| (P) Lake. From Morgan. (v, 1886)                                                              | 234    | (Witt.) (v, 1886)                                                                                 | 503      |
| (P) Lake. From The Knickerbocker Co. (v, 1886)                                                | 594    | -Pumps, Displacement. (P) Hargreaves and Hudson. (xi, 1892)                                       | 804      |
| (P) Simon. (v, 1886)                                                                          | 653    | Purification of and App. therefor. (P) Gontard. (v, 1886)                                         | 317      |
| Apparatus for Separating Gases from. (P) Cryer. (x, 1891)                                     | 528    | Quant. Estimation of Dust in the. (Arens.) (xiv, 1895)                                            | 293      |
| Apparatus for Supplying, for Combustion with Gas. (P) Thorp. (iv, 1885)                       | 110    | Separating Oxygen from. (P) Parkinson. (xi, 1892)                                                 | 633      |
| Apparatus for Supplying Furnace Fires with Moistened. (P) Las and Robins. (viii, 1889)        | 381    | Sterilising Atmos. (P) Angel and Candy. (vii, 1888)                                               | 763      |
| Apparatus for Treating Fibres, &c. with Hot. (P) Remy. (x, 1891)                              | 135    | Superheaters. (P) Schmidt. (xii, 1893)                                                            | 659      |
| Apparatus for Treating Foul. (P) Makinson. (xi, 1892)                                         | 704    | Supplied to Boilers, Influence of Temperature of. (Pou-pardin.) (ix, 1890)                        | 482      |
| App. for Treating, to Obtain Oxygen. (P) Neave. (x, 1891)                                     | 384    | Supplying Heated, to Furnaces. (P) Hawksley. (xi, 1892)                                           | 946      |
| Apparatus, Staib's Hot. (P) Durr. (ii, 1883)                                                  | 127    | Supplying Sterilised, to Rooms. (P) Elmont. (xiii, 1894)                                          | 833      |
| "Arkios" App. for Making Cold. (Perkins.) (viii, 1889)                                        | 378    | Tanks for Storage of Compressed. (P) Timmis. (xiii, 1894)                                         | 788      |
| Attempts to Estimate Sulphur Compounds in the. (Oates.) (xiii, 1894)                          | 1222   | Thermometer:                                                                                      |          |
| Bath, New Form of. (Sauer.) (xiii, 1894)                                                      | 662    | (Grassi.) (v, 1886)                                                                               | 509      |
| Baths, Regulation of Low Temp. in. (Ekenberg.) (vi, 1887)                                     | 562    | (Subine.) (x, 1891)                                                                               | 162      |
| Behaviour of Coloured Fabrics to. (Bouboff.) (iii, 1884)                                      | 476    | Use of Hot, in Drying. (Cook.) (xiv, 1895)                                                        | 421      |
| Bleaching by Exposure to. (Buisine.) (x, 1891)                                                | 707    | Use of, in Maltng. (Stopes.) (ix, 1890)                                                           | 314      |
| Cocks for Mixing Gas with. (P) Goehde. (x, 1891)                                              | 528    | Utilising Heated, in Drying Apparatus. (P) Leydecker. (xi, 1892)                                  | 509      |
| Combustion of Carbon in. (Ernst.) (xii, 1893)                                                 | 813    | Zymotechnical Analysis of Micro-Organisms of the. (Hansen.) (viii, 1889)                          | 472      |
| Composition of Limiting Explosive Mixtures of Gases with. (Clowes.) (xiv, 1895)               | 1024   | Alabaster, Hardening and Colouring. (P) Sociéte Anonyme de Cartaldo. (ii, 1883)                   | 282      |
| Compressors. (P) Johnson and Hutchinson. (xi, 1892)                                           | 993    | Alang-Alang, Production of. (T.R.) (ix, 1890)                                                     | 223      |
| Contained in Soil. (Schloesing, jun.) (ix, 1890)                                              | 306    | Alant Root (Inula Helenium), Active Principles of. (Marp-mann.) (vi, 1887)                        | 520      |
| Contamination of, by Illuminants. (Cramer.) (x, 1891)                                         | 351    | Alarm, Automatic, for Water Ovens and Water Baths. (Web-ster.) (xiii, 1894)                       | 205      |
| Currents, Multiplying Anemometer for Measuring Velocity of. (Bourdon.) (i, 1882)              | 60     | For Steam Generators. (P) Wagener. (ii, 1885)                                                     | 34       |
| Deposition of Matter in. (P) Lorrain. (vi, 1887)                                              | 378    | Alaska, Wealth and Resources of. (T.R.) (x, 1891)                                                 | 498      |
| Determination of Carbonic Acid in. (Lange and Zecken-dorf.) (vii, 1888)                       | 630    | Albane, Use of, for Making Varnish, Cement, Waterproofing Material, &c. (P) Renison. (xiii, 1894) | 648      |
|                                                                                               |        | Alberti and Hempel's Method of Estimating Ash in Sugar. (Stift.) (xii, 1893)                      | 869      |

| Production of Caustic and Chlorine. (P) Lyte. (xi, 1892).....                                                | 686  |
| Proof Vessels. (Dittmar.) (xii, 1894).....                                                                   | 303  |
| Putting up Caustic. (P) Rabbitt. (ix, 1882).....                                                             | 321  |
| Residues, Utilisation of. (P) Wieg. (v, 1886).....                                                           | 325  |
| Retention of, by Precipitated Barium Carbonate. (Watson Smith.) (i, 1882).....                               | 86   |
| Salts, App. for Electrolysis of. (P) Störmer. (xiv, 1895).....                                               | 800  |
| Separation and Utilisation of Used. (P) Lane and Stenurt. (iii, 1884).....                                   | 107  |
| Separation of, from Electrolytes. (P) Kellner. (xi, 1892).....                                               | 755  |
| Test for Kerosene, Naphtha Products, and Hydrocarbon Lubricants. (Lissencok and Stepanow.) (xiii, 1894)..... | 177  |
| Trade Combination. (T.R.) (ix, 1890).....                                                                    | 780  |
| Trade, Progress of the. (T.R.) (vii, 1888).....                                                              | 875  |
| Trade, Statistics of English. (First Proceedings).....                                                       | 4    |
| Use of Calcium Sulphhydrate in Manufacture of. (Leith.) (x, 1891).....                                       | 211  |
| Use of Sulphuretted Hydrogen in Manufacture of. (P) Simpson. (x, 1891).....                                  | 926  |
| Alkali-Waste, Apparatus for Treatment of. (P) Simpson. (ii, 1883).....                                       | 476  |
| Cement from. (P) Rigby, Neill, and Carr. (xiii, 1894).....                                                   | 638  |
| Decomposition of. (Fawsitt.) (v, 1886).....                                                                  | 93   |
| Estimation of Soda in. (Lunge.) (ix, 1890).....                                                              | 1018 |
| Extract of Sulphur Comp. from. (P) Simpson. (iii, 1884).....                                                 | 250  |
| Extraction of Sulphur from. (P) Raves. (i, 1882).....                                                        | 454  |
| For Treatment of Parasitic Diseases. (Duponchel.) (v, 1886).....                                             | 163  |
| Free Sulphur or Free Sulphurous Acid from. (P) Claus. (iii, 1884).....                                       | 485  |
| From Leblanc Process, Utilisation of. (P) Parnell and Simpson. (iv, 1885).....                               | 408  |
| Manuf. of Portland Cement from. (Spackman.) (xi, 1892).....                                                  | 497  |
| Manufacture of Sulphur, &c. from. (P) Maudsley and Macfarlane. (v, 1886).....                                | 536  |
| Manure from. (P) Brock. (i, 1882).....                                                                       | 374  |
| Obtaining Sulphuretted Hydrogen and Calcium Carbonate from. (P) Renaut. From von Miller. (iii, 1884).....    | 485  |
| Production of Sulphuretted Hydrogen from. (P) Davidson and Davis. (x, 1891).....                             | 643  |
| Recovery of Sulphur from:                                                                                    |      |
| (Chance)..... (i, 1882), 172; (vii, 1888).....                                                               | 162  |
| (Divers)..... (iii, 1884), 550; (iv, 1885).....                                                              | 31   |
| (P) Weldon. (ii, 1883), 414; (iv, 1885).....                                                                 | 171  |
| (P) Weldon. From Lombard. (iii, 1884).....                                                                   | 253  |
| Regeneration of Sulphur and Limestone from. (Opl.) (i, 1882).....                                            | 452  |
| Sulphuric Acid from. (P) Hanson. (vii, 1888).....                                                            | 625  |
| Treating Ammonium Chloride with. (P) Leith. (x, 1891).....                                                   | 367  |
| Treatment of. (P) Newhall. (v, 1886).....                                                                    | 167  |
| Treatment of, and Apparatus therefor:                                                                        |      |
| (P) Chance. (vii, 1888).....                                                                                 | 210  |
| (P) Hargreaves and Robinson. (viii, 1889), 118; (ix, 1890).....                                              | 509  |
| Treatment of, for Deodorisation of Sewage. (P) Hanson. (vii, 1888).....                                      | 763  |
| Treatment of Yellow Liquors from, to obtain H <sub>2</sub> S. (P) Chance. (viii, 1889).....                  | 119  |
| Utilisation of:                                                                                              |      |
| (Kingzett.) (i, 1882).....                                                                                   | 81   |
| (P) Maeter. (i, 1883).....                                                                                   | 319  |
| Alkali Works Act Amendment Bill, Discussions on. (T.R.) (xi, 1892).....                                      | 471  |
| Works Act, Notes on the. (T.R.) (vii, 1888).....                                                             | 785  |
| Works, Analytical Methods for. (Lunge.) (ix, 1890).....                                                      | 1013 |

| Compounds as Mordants. (Schlumberger.) (xiv, 1895).....                                                  | 362  |
| Compounds, Manufacture of. (P) Cass. (xii, 1893).....                                                    | 1032 |
| Compounds, Production of Bronze from. (P) Johnson. From Varin. (iii, 1884).....                          | 180  |
| Corrosion of, by Chemical Agents. (Arche.) (xii, 1893).....                                              | 270  |
| Crystalline Carbide of. (Moissan.) (xiii, 1894).....                                                     | 1189 |
| Decomposition of Sodium Peroxide by. (Rossell and Frank.) (xiii, 1894).....                              | 516  |
| Decoration of Porcelain and Glass by. (ix, 1890).....                                                    | 943  |
| Deposition of. (Swinburne.) (xi, 1892).....                                                              | 824  |
| Distribution of, in Plants. (Ricciardi.) (ix, 1890).....                                                 | 525  |
| Durability of. (Winkler.) (xi, 1892).....                                                                | 244  |
| Electric Reduction of. (P) Willson. (xi, 1892).....                                                      | 354  |
| Electro-Deposition of:                                                                                   |      |
| (P) Gomess. (xiv, 1895).....                                                                             | 757  |
| (P) Harris. (xiv, 1895).....                                                                             | 166  |
| (P) Lake. From Montgelas. (v, 1886), 616; (vi, 1887).....                                                | 380  |
| Electrolytic Deposit with. (P) Woble. (x, 1891).....                                                     | 776  |
| Electrolytic Production of. (P) Grabau. (xi, 1892).....                                                  | 617  |
| Electrometallurgy of. (xiii, 1894).....                                                                  | 43   |
| (Minet.) (x, 1891).....                                                                                  | 470  |
| Estimation of. (Kretschmar.) (v, 1886).....                                                              | 176  |
| Estimation of, in Presence of Phosphoric Acid. (v, 1886).....                                            | 219  |
| Experiments with. (Andrews.) (xi, 1895).....                                                             | 160  |
| Extracting, from Alumina. (P) Reillon, Montagne, and Bourzerel. (vi, 1887).....                          | 512  |
| Extraction and Electro-Deposition of. (P) Marino. (ix, 1890).....                                        | 297  |
| Extraction of:                                                                                           |      |
| (P) Lake. From Seymour and Brown. (iv, 1885).....                                                        | 121  |
| (P) Lake. From Seymour. (vii, 1888).....                                                                 | 504  |
| (P) Netto. (vii, 1888), 217; (viii, 1889), 547; (ix, 1890).....                                          | 194  |
| Extraction of, and Combination with other Metals. (P) Baldwin. (vii, 1888).....                          | 389  |
| Extraction of, and Formation of Alloys. (P) Pearson and others. (vii, 1888).....                         | 753  |
| Extraction of, from its Fluorides, by Electrolysis. (P) de Pass. From Bernard. (vii, 1888).....          | 328  |
| Extraction of, from its Chloride. (P) Thowless. (vi, 1887).....                                          | 731  |
| Extraction of, from its Chlorides, and Apparatus therefor. (P) Lake. From de Montgelas. (vii, 1888)..... | 35   |
| Factory at Neuhansen. (Wedding.) (xi, 1892).....                                                         | 910  |
| Fluoride, Dissociation of, from Artificial Cryolite. (Asboth.) (ix, 1890).....                           | 945  |
| Fluoride, Electrolysis of. (Minet.) (ix, 1890).....                                                      | 520  |
| Fluoride, Manufacture of:                                                                                |      |
| (P) Grabau. (vi, 1887), 820; (vii, 1888), 673; (xii, 1893).....                                          | 690  |
| (P) Groth. From Gratzel. (iv, 1885).....                                                                 | 744  |
| (P) Lindsay. (x, 1891).....                                                                              | 926  |
| Flux for Soldering. (P) Thompson. From Nicolai. (xiii, 1894).....                                        | 830  |
| Foil as a Beer-clearing Agent. (Windisch.) (xiii, 1894).....                                             | 969  |
| For Naval Construction. (Yarrow.) (xiv, 1895).....                                                       | 487  |
| For Refining certain Metals. (xiii, 1894).....                                                           | 955  |
| For Vessels for Containing Food. (Rupp.) (xi, 1892).....                                                 | 172  |
| From Chloride and Double Chlorides. (P) Lake. From de Montgelas. (v, 1886).....                          | 608  |
| Furnace, Cowles'. (Thompson.) (v, 1886).....                                                             | 206  |
| Hydrate or Salts, Extraction of. (P) Meyer. (xi, 1892).....                                              | 747  |
| Hydroxide, Preparation of Sugar by Means of. (Juncmann.) (iv, 1885).....                                 | 541  |
| Hydroxide, Relations between Ferric Hydroxide and. (Schneider.) (ix, 1890).....                          | 837  |
| Impurities of Commercial. (Moissan.) (xiii, 1894), 1193; (xiv, 1895), 368                                |      |

| Amidobenzene, Preparation of Dyestuffs by Action of Diazo Compounds of. (P) Krugener. (i, 1882).....                                         | 106  | Amidotriphenylcarbinol, Para-. (Baeyer and Löhr.) (ix, 1890).....                                                  | 931  |
| Amidobenzophenones and Aromatic Amines; Synthesis of Rosanilines from. (Mühlhäuser.) (viii, 1889).....                                       | 536  | Amidogalericianic Acid. (Schulze and Barbieri.) (iii, 1884).....                                                   | 323  |
| Prod. of Dialkylised. (P) Abel. From the "Farbwerke vormals Meister, Lucius, and Brüning." (vii, 1888).....                                  | 430  | Amine Bases, Recovery of Iron from Residue in Manuf. of. (P) Bromhead. From Landshoff and Meyer. (xiii, 1894)..... | 42   |
| Amidocarbinals, Para-. (Fischer.) (x, 1891).....                                                                                             | 535  | Amines, Action of Soda, Lime, and Magnesia on Organic. (Lunge.) (ii, 1883).....                                    | 514  |
| Amidochrysene. (Abegg.) (ix, 1890).....                                                                                                      | 600  | Action of Sulphur on certain. (Anschutz and Schultz.) (ix, 1890).....                                              | 49   |
| Obtainment of. (Bamberger and Burgdorf.) (ix, 1890).....                                                                                     | 605  | Aromatic, Preparation of Violet and Blue Colours from. (P) Fischer. (i, 1882).....                                 | 145  |
| Amido-compounds for Development of Photographs. (P) Hauff. (xi, 1892).....                                                                   | 937  | Colour Reactions of Aromatic. (Lauth.) (x, 1891).....                                                              | 389  |
| Formation of Haloid Substituted. (Kock.) (vi, 1887).....                                                                                     | 653  | Colouring Matters from Fatty. (P) Inray. From La Société Durand, Huguenin, et Cie. (x, 1891).....                  | 133  |
| Prep. and Employment of Aromatic. (P) Hauff. (xi, 1892).....                                                                                 | 1032 | Combination of Tetrazo Comp. with. (P) Paul. (vii, 1888).....                                                      | 482  |
| Amidocresol, Conversion of Toluylene-diamine into. (Walbach.) (ii, 1883).....                                                                | 39   | Condensation of Chloral-hydrate with Tertiary. (Boessneck.) (iv, 1885).....                                        | 491  |
| Amidocresolsulpho Acids, Production of. (P) Lake. From Oehler. (xiii, 1894).....                                                             | 723  | Conversion of Phenols into. (Buch.) (iv, 1885).....                                                                | 276  |
| Amido-crotonic Acid, Manufacture of Derivatives of. (P) Abel. From Boehringer. (xii, 1893).....                                              | 463  | Formation of Quinones from Paramethylated. (Noelting and Baumann.) (iv, 1885).....                                 | 489  |
| Amidodialkyl- $\alpha$ -toluidine, Conversion of $m$ -, into Methylene Blue. (Bernthsen.) (xii, 1893).....                                   | 139  | Laws Governing the Substitution of the Aromatic. (Limpach.) (vii, 1888).....                                       | 429  |
| Amidodimethylanilinemercaptide and Derivatives. (viii, 1889).....                                                                            | 454  | Primary and Secondary, Conversion of Homologues of Phenol into. (Lloyd.) (vi, 1887).....                           | 652  |
| Amidodiphenyl- $\alpha$ -disulphonic Acid. (Limpricht.) (x, 1891).....                                                                       | 690  | Quinones from Para-methylated. (Noelting and Baumann.) (iv, 1885).....                                             | 398  |
| Amidodiphenylsulphonic Acid. (Carnelley and Schlesselman.) (v, 1886).....                                                                    | 376  | Reactions for Aromatic. (Ihl.) (vii, 1888).....                                                                    | 744  |
| Acid, Para-, Preparation of. (Carnelley.) (vi, 1887).....                                                                                    | 139  | Synthesis of Rosanilines from Aromatic. (Mühlhäuser.) (viii, 1889).....                                            | 610  |
| Amidoflavopurpurine, Prod. of Col. Mat. from. (P) Inray. From The Farbwerke vormals Meister, Lucius, and Brüning. (x, 1891).....             | 249  | Tertiary, and Aromatic Acid Chlorides, Preparation of Rosanilines from. (Mühlhäuser.) (viii, 1889).....            | 506  |
| Amidogene (a New Explosive). (i, 1882).....                                                                                                  | 201  | Theory of Formation of Colouring Matters by Oxidation of Aromatic. (Barsilowski.) (vii, 1888).....                 | 384  |
| Amidokairoline. (Feer and Koenigs.) (iv, 1885).....                                                                                          | 752  | Thio-derivatives of Aromatic. (Holzmann.) (vii, 1888).....                                                         | 672  |
| Amidol and Metol. (xi, 1892).....                                                                                                            | 634  | Transference of Primary, into Mononitrophenols. (Noelting and Wild.) (iv, 1885).....                               | 398  |
| Amidoaceneaphthene, Mono- and Di-, Properties of. (Quinke.) (vii, 1888).....                                                                 | 382  | Ammonia, Testing of Liquor. (Hertkorn.) (xi, 1892).....                                                            | 457  |
| Amidonaphthalene Sulphonic Acid, $\alpha$ - and $\beta$ -. (Cleve.) (x, 1891).....                                                           | 1062 | Ammonia, Absorption of, from Air by Soil. (Schloesing.) (ix, 1890).....                                            | 635  |
| Sulphonic Acid, $\delta$ - and $\gamma$ -. (Cleve.) (viii, 1889).....                                                                        | 116  | Action of Gaseous, on Magenta. (Prud'homme and Rabaut.) (xiii, 1894).....                                          | 382  |
| Amidonaphthol, Manufacture of Sulpho Acids of. (P) Willcox. From The Farbenfabriken vorm. Bayer and Co. (x, 1891).....                       | 760  | Action of, on Cotton. (Vignon.) (x, 1891).....                                                                     | 694  |
| Amidonaphtholdisulpho Acid, Manufacture of. (P) Newton. From Farbenfabriken vormals Bayer. (xiii, 1894).....                                 | 943  | Action of, on Dextrose. (Stone.) (xiv, 1895).....                                                                  | 589  |
| Acid, Manufacture of 2:7-. (P) Abel. From Actien Gesellschaft für Anilin Fabrikation. (xiii, 1894).....                                      | 876  | Action of, on Levulose-Carboxylic Acid. (Dull.) (x, 1891).....                                                     | 558  |
| Amidonaphtholsulpho Acids, Production of. (P) Newton. From Farbenfabriken vormals Bayer. (xiii, 1894).....                                   | 800  | Action of, on Potassium Salts. (Girard.) (iv, 1885).....                                                           | 593  |
| Amidonaphtholsulpho Acids, Production of. (P) Pitt. From Cassella and Co. (xi, 1892), 345; (xiii, 1894).....                                 | 244  | Action of, on Silver Mercurous Chloride. (Jones.) (xii, 1893).....                                                 | 985  |
| Amidonaphtholsulphonic Acid, Preparation of. (P) Pitt. From Cassella and Co. (ix, 1890), 935; (x, 1891).....                                 | 918  | Action of, on Solubility of Ammonium Chloride. (Engel.) (xi, 1892).....                                            | 238  |
| Amidonaphtholsulphonic Acid, New Dyestuffs from. (P) Pitt. From Cassella and Co. (xii, 1893).....                                            | 674  | Action of, on Tetrolurethane. (i, 1882).....                                                                       | 494  |
| Sulphonic Acids, Oxidation Compounds of. (Reverdin and de la Harpe.) (xi, 1892).....                                                         | 997  | Action of Sulphur on. (Senders.) (vi, 1887).....                                                                   | 367  |
| Amido-nitro-anthraquinone, Blue Colouring Matters from. (P) Inray. From "Farbwerke vormals Meister, Lucius, and Brüning." (xii, 1893).....   | 923  | And Ammoniacal Salts, Collection of. (P) Cuyper. (xii, 1893).....                                                  | 511  |
| Amidophenol, Action of Chlorine on $o$ -. (Zincke and Kuster.) (ix, 1890).....                                                               | 601  | And Ammonium Salts, Apparatus for Production of. (P) Lake. From Brison. (iv, 1885).....                            | 678  |
| Action of Sodium Sulphite on Salts of. (Lumière and Seyewetz.) (xii, 1893).....                                                              | 864  | And Chlorine from Ammonium Chloride, Obtaining. (P) Mond. (vi, 1887).....                                          | 140  |
| Colour Reaction for $p$ -. (Michaëlis and Luxembourg.) (xiv, 1895).....                                                                      | 513  | And Chlorine, Production of. (P) Mills. From Verein für Chemische Industrie. (v, 1886).....                        | 379  |
| Ethers and Aromatic Oxaldehydes, Manuf. of Comp. of $p$ -. (P) Inray. From Society of Chem. Ind. in Basel. (xiii, 1894).....                 | 274  | And Cyanogen Compounds, Manufacture of. (P) Mond. (i, 1882).....                                                   | 364  |
| Ortho-, Triphenyldioxazine as an Oxidation Product of. (Seidel.) (ix, 1890).....                                                             | 492  | And Gas, Manuf. of. (P) Lake. From Hennin. (x, 1891).....                                                          | 946  |
| Presence of Sulphur in Para-. (Hantzsch and Freese.) (xiv, 1895).....                                                                        | 808  | And Hydrocarbon Gases, Manufacture of. (P) Lake. From Focarty. (iii, 1884).....                                    | 474  |
| Production of. (P) Lake. From Oehler. (xiii, 1894).....                                                                                      | 723  | And Hydrochloric Acid from Ammonium Chloride, Obtaining. (P) Mond. (vi, 1887).....                                 | 140  |
| Sulphonic Acids. (Brunner and Krämer.) (iv, 1885).....                                                                                       | 51   | And its Salts, Manufacture of. (P) d'Andria. (viii, 1889).....                                                     | 284  |
| Amidophenols, Carbonic Esters of Acidyl Derivatives of. (P) Inray. From The Farbwerke vormals Meister, Lucius, and Brüning. (xiv, 1895)..... | 1061 | And its Sesquicarbonate, Manufacture of. (P) Chatfield. (viii, 1889).....                                          | 284  |
| Ethylene Ethers of. (Krohn.) (ix, 1890).....                                                                                                 | 280  | And Methylamines, Analysis of Mixtures of. (Quantin.) (xii, 1893).....                                             | 294  |
| Manuf. of. (P) Lake. From Leonhardt and Co. (ix, 1890).....                                                                                  | 608  | And Nitrous Acid, Formation of, from Free Nitrogen. (Loew.) (ix, 1890).....                                        | 979  |
| Naphthalene of Substituted. (Ulzer and Holler.) (xiii, 1894).....                                                                            | 799  | And Tar, Collection of, from Coke Ovens. (Jicinsky.) (viii, 1889).....                                             | 382  |
| Obtaining, in Free State. (Lumière and Seyewetz.) (xii, 1893).....                                                                           | 864  | And Tar, Recovery of, in Making Coke. (viii, 1889).....                                                            | 697  |
| Oxidation Prod. of Ortho-. (Fischer and Hepp.) (ix, 1890).....                                                                               | 1025 | And Tar, Separation of, from Gases, and Apparatus therefor. (P) Mackay. (ix, 1891).....                            | 1120 |
| Amidophenylinduline. (Fischer and Hepp.) (x, 1891), 458; (xi, 1892), 157.....                                                                | 157  | Apparatus: (P) Davis. (xiii, 1891).....                                                                            | 948  |
| Amidophenylpiperidine, Dyes from. (Lellmann and Geller.) (vii, 1888).....                                                                    | 671  | (P) Henderson. (v, 1886).....                                                                                      | 667  |
| Amidopyrene and Nitropyrene, Preparation of. (Goldschmidt.) (i, 1882).....                                                                   | 62   | Apparatus for Distillation of. (P) Meldrum. (x, 1891).....                                                         | 462  |
| Amido-quinones and Quinone Imides. (Kehrmann.) (ix, 1890).....                                                                               | 603  | (P) Simon. From Berlin Anhaltische Maschinenbau-Actien Gesellschaft. (v, 1888).....                                | 167  |
| Amido saccharine. (viii, 1889).....                                                                                                          | 476  | Apparatus for Distilling Liquids containing. (P) Grunenberg. (i, 1882).....                                        | 408  |
| Amido-sulpho Acid, Manufacture of. (P) Johnson. From Badische Anilin und Soda Fabrik. (xiii, 1894).....                                      | 724  | Apparatus for Distilling Liquor for Producing Sulphate of. (P) Dempster. (vi, 1887).....                           | 42   |
|                                                                                                                                              |      | Apparatus for Extracting, from Ammonia Soda Solutions. (P) Mond. (ii, 1883).....                                   | 477  |
|                                                                                                                                              |      | Apparatus for Extracting, from Elastic Furnace Gases. (P) Dempster. (ix, 1895).....                                | 531  |
|                                                                                                                                              |      | App. for Extract. from Coal-Gas. (P) Hanson. (iv, 1885).....                                                       | 49   |
|                                                                                                                                              |      | Apparatus for Extraction of. (P) Wells. (xi, 1892).....                                                            | 747  |
|                                                                                                                                              |      | Apparatus for Fixing Colour on Calico by Means of. (P) Diehl. (ii, 1883).....                                      | 245  |
|                                                                                                                                              |      | Apparatus for Manufacture of. (P) Feldman. (ii, 1883).....                                                         | 239  |
|                                                                                                                                              |      | App. for Manuf. of Liquid. (P) Dempster. (xii, 1893).....                                                          | 1030 |

|-----------------------------------------------------------------------------------------------------------|------|
| Apparatus for obtaining:                                                                                  |      |
| (P) Deacon and Hurter. (vi, 1887).....                                                                    | 509  |
| (P) Duncan. (iii, 1881).....                                                                              | 630  |
| (P) Lake. From Sternberg. (xiii, 1894).....                                                               | 887  |
| (P) Lorenz. (iii, 1884).....                                                                              | 630  |
| (P) Wirth. From Philipp. (ii, 1883).....                                                                  | 477  |
| Apparatus for Producing Sulphate of (P) Mills. From Fozarty. (vii, 1888).....                             | 35   |
| Apparatus for Recovery of, in Manufacture of Coke:                                                        |      |
| (P) Hornig. (ii, 1883).....                                                                               | 267  |
| (P) Schneider. (ii, 1883).....                                                                            | 329  |
| Apparatus for Separation of, from Furnace Gases. (P) Chapman. (iii, 1884).....                            | 415  |
| Aqueous Solutions of, at Different Specific Gravities. (Grünberg.) (viii, 1889).....                      | 390  |
| Arrangements in Coke Ovens to Recover. (P) Otto. (i, 1882).....                                           | 414  |
| As a Reagent for Double Ketones. (Knorr.) (v, 1886).....                                                  | 180  |
| Bichromate of, Manufacture of. (P) Park. (vi, 1887).....                                                  | 442  |
| Carriage of Liquid, on Ship. (T.K.) (xiv, 1895).....                                                      | 889  |
| Chlorides of Mercury, Prod. of. (André.) (viii, 1889).....                                                | 915  |
| Claus's Process for the Purification of Coal-Gas by. (Watts.) (vi, 1887).....                             | 25   |
| Collecting, from Sewage. (P) Cox. (iv, 1885).....                                                         | 234  |
| Comparative Value of Nitrogen as, and as Nitrate. (Samek.) (viii, 1889).....                              | 556  |
| Composition of Commercial Liquid. (von Strombeck.) (xi, 1892).....                                        | 736  |
| Compounds, App. for Manuf. of. (P) Holst. (x, 1891).....                                                  | 551  |
| Compounds Formed by Colouring Matters of Magenta Group and. (Prud'homme and Rabaut.) (xiii, 1894).....    | 382  |
| Compounds from Coal-Gas. (P) Claus. (vi, 1887).....                                                       | 502  |
| Compounds of Alkali Metals with:                                                                          |      |
| (Bakhuus-Roozeboom.) (ix, 1890).....                                                                      | 507  |
| (Joannis.) (ix, 1890).....                                                                                | 508  |
| Compounds of Chlorides of Mercury with. (André.) (ix, 1890).....                                          | 617  |
| Compounds of Mercuric Cyanide. (Varet.) (x, 1891).....                                                    | 697  |
| Compressors. (P) Osenbrück. (ii, 1883).....                                                               | 343  |
| Constants of. (von Strombeck.) (x, 1891).....                                                             | 637  |
| Conversion of Nitrogen of Oil-Works Sludge into. (Redwood.) (x, 1891).....                                | 108  |
| Cupr. Production of. (P) Hime and Noad. (ix, 1890).....                                                   | 391  |
| Decomposition of, by Heat. (Ramsay and Young.) (iii, 1884).....                                           | 157  |
| Decomposition of Chlorides and Iodides of Amines by (Prud'homme and Rabaut.) (xiii, 1894).....            | 382  |
| Defecation of Beetroot Juice with. (Hanus.) (xiii, 1894).....                                             | 263  |
| Dehydration of. (P) Mather. (xii, 1893).....                                                              | 762  |
| Deleterious Effect of, on Plants. (Bomer and others.) (xii, 1893).....                                    | 295  |
| Detection and Estimation of, in Animal Fluids. (Latzchenberger.) (iii, 1884).....                         | 494  |
| Detection of, in Alkaline Salts. (de Koninck.) (vi, 1887).....                                            | 384  |
| Determination of:                                                                                         |      |
| (Hintz.) (vii, 1888).....                                                                                 | 772  |
| (Mile.) (vi, 1887).....                                                                                   | 423  |
| Determination of Nitric Acid as. (Reichardt.) (v, 1886).....                                              | 617  |
| Development of, in Working Iron. (Wedding.) (vi, 1887).....                                               | 664  |
| Direct Assimilation of, by Plants. (Muntz.) (ix, 1890).....                                               | 524  |
| Direct from the Air. (P) Young. (xiii, 1894).....                                                         | 1196 |
| Distilling and Refrigerating App. (P) Fuller. (xii, 1893).....                                            | 743  |
| Distribution and Recovery of Anhydrous. (P) Branson, Thornburgh, and Starr. (xii, 1893).....              | 743  |
| Engines and Apparatus Connected with. (P) Campbell. (viii, 1889).....                                     | 531  |
| Estimation of:                                                                                            |      |
| (Henry.) (xiii, 1894).....                                                                                | 764  |
| (Hosva.) (xiii, 1894).....                                                                                | 842  |
| (Stein and Schwarz.) (viii, 1889).....                                                                    | 921  |
| Estimation of Formaldehyde by Titration with. (Eschweiler.) (ix, 1890).....                               | 116  |
| Explosives from Nitrate of, and Resins. (P) Abel. From König. (xii, 1894).....                            | 543  |
| Extraction of, from Furnace Gases. (P) Lake. From Soc. Anon. Lorraine Indus. de Hussigny. (iv, 1885)..... | 332  |
| Extraction of, from Sewage. (P) Truchelut. (vii, 1888).....                                               | 862  |
| Ferment. Destruction of the. (Ladureau.) (vi, 1887).....                                                  | 826  |
| Flask for Estimating, in Waters. (Coleman.) (xi, 1892).....                                               | 327  |
| Formn. of, at Expense of Plants. (Berthelot.) (ix, 1890).....                                             | 86   |
| Formation of, from Nitrates. (Loew.) (ix, 1890).....                                                      | 634  |
| -Freezing Machines, Modifications in. (P) Stockmann. (i, 1882).....                                       | 176  |
| From Blast-Furnace Gases. (P) Main and Galbraith. (iv, 1885).....                                         | 111  |
| From Blast-Furnaces, Processes for Recovery of. (Jones.) (iv, 1885).....                                  | 737  |
| From Coal. Influence of Temperature on Yield of. (Wright.) (vii, 1888).....                               | 62   |
| From Gas, Apparatus for Extract. (P) Lister. (xi, 1892).....                                              | 511  |
| From Gas-purifying Materials, Obtaining, before Regeneration. (P) Richters. (i, 1882).....                | 63   |
| From Gas-Water, Apparatus for Obtaining. (P) Wender. (i, 1882).....                                       | 180  |
| From Nitrogen of Minerals, Prod. of. (Beilby.) (iii, 1884).....                                           | 216  |
| From Nitrogenous Organic Substances. (P) Thompson. From Kuntze. (xi, 1892).....                           | 511  |
| From Organic Compounds, Production of. (P) Wise. From Gronven. (i, 1882).....                             | 68   |
| From Waste Waters, Obtaining. (P) Storer. (i, 1882).....                                                  | 189  |
| Gas, Action of, on Peroxides. (Michel and Grandmougin.) (xiii, 1894).....                                 | 37   |

| Muriate of, from Chloride Liquors. (P) Wigg. (vii, 1888).....                                                                        | 626      |
| Nitrate of, Production of. (P) Chanee. (v, 1886).....                                                                                | 325      |
| Nitrification of. (Schlosing.) (ix, 1890).....                                                                                       | 86       |
| Nitrogen in Soil, Estimation of. (Baumann.) (vi, 1887).....                                                                          | 826      |
| Obtaining. (P) Mariott. (i, 1882).....                                                                                               | 221      |
| Obtaining Anhydrous Liquid. (P) Page. (viii, 1889).....                                                                              | 462      |
| Obtaining, from Ammonium Chloride. (P) Mond. (xi, 1887), 216, 217, 289; (vii, 1888), 626; (ix, 1890), 291; (xii, 1893), 925          |          |
| Obtaining, from Ammonium Chloride, and Apparatus therefor. (P) Bale. (ix, 1890).....                                                 | 861      |
| Obtaining, from Coal. (P) Mond. (iii, 1884).....                                                                                     | 236      |
| Obtaining, from Coal-Gas:                                                                                                            |          |
| (P) Claus. (ii, 1883).....                                                                                                           | 264      |
| (P) Cooper. (iii, 1884).....                                                                                                         | 107      |
| Obtaining, from Faecal Matter. (P) Thompson. From Wirth and Co. (xiv, 1895).....                                                     | 977      |
| Obtaining, from Furnace Gases:                                                                                                       |          |
| (P) Addie. (ii, 1883).....                                                                                                           | 264      |
| (P) Neilson. (i, 1882).....                                                                                                          | 305      |
| Obtaining, from Nitrogen and Hydrogen, and Apparatus therefor. (P) Fell. From The American Ammonia Manufacturing Co. (ix, 1890)..... | 392      |
| Obtaining, from Organic Matter. (P) Lake. From Sternberg. (xii, 1893).....                                                           | 263      |
| Obtaining, from Sewage. (P) Young. (iii, 1884).....                                                                                  | 630      |
| Obtaining, in Distillation of Minerals. (P) Neilson and Snoderass. (v, 1886).....                                                    | 237      |
| Obtaining, in Manuf. of Soda. (P) McDougall. (iv, 1885).....                                                                         | 458      |
| Obtainment of, from Bone Furnaces. (P) Lorenz. (ii, 1883).....                                                                       | 380      |
| Obtainment of, from Carbonaceous Minerals. (P) Neilson and Cunningham. (ii, 1883).....                                               | 267      |
| Occurrence of, in Plants. (Pellet.) (i, 1882).....                                                                                   | 114      |
| Occurrence of Pyridine in Commercial. (Ost.) (iii, 1884).....                                                                        | 318      |
| Oxidation of. (Smith.) (vii, 1888).....                                                                                              | 307      |
| Precipitation of Aluminium and Iron by. (Lunge.) (ix, 1890).....                                                                     | 111      |
| Preparation of. (Brueck.) (iii, 1884).....                                                                                           | 510      |
| Preparation of, from Nitrogen of Air and Hydrogen of Water. (P) Gesellschaft L'Azote. (i, 1882).....                                 | 150      |
| Preparation of Gaseous. (Isambert.) (iv, 1885).....                                                                                  | 401      |
| Prev. Loss of, from Liquid Manure. (Mayer.) (v, 1886).....                                                                           | 611      |
| Process and App. for Distilling. (P) Wren. (v, 1886).....                                                                            | 487      |
| Process and App. for Recovery of. (P) Halberstadt. (i, 1882).....                                                                    | 180      |
| -Process, Manufacture of Bicarbonate and Carbonate of Soda by the. (P) Burns. (vi, 1887).....                                        | 729      |
| -Process, Manufacture of Soda by:                                                                                                    |          |
| (P) Claus, Sulman, and Berry. (vii, 1888).....                                                                                       | 435      |
| (P) Imray. From La Société Anonyme des Produits Chimiques du Sud-Ouest. (iii, 1884).....                                             | 485      |
| (P) Ricard. (x, 1891).....                                                                                                           | 462      |

| Production of, and Purification of Alkaline Solutions. (P) Carey, Gaskell, and Hurter. (i, 1882) .                            | 26            |
| Production of, from Coal. (Schilling.) (vi, 1887) .                                                                           | 652           |
| Production of, from Coke. (Tervet.) (ii, 1883) .                                                                              | 445           |
| Prod. of, from Leblanc Black Ash. (Hawliczek.) (viii, 1889) .                                                                 | 351           |
| Production of, from Manure. (P) Nast. (vi, 1887) .                                                                            | 553           |
| Prod. of, from Molasses, &c. (P) Meyer. (viii, 1889) .                                                                        | 128           |
| Production of, in making Coke or Gas. (P) Simon and Smith. (iii, 1884) .                                                      | 435           |
| Purification of. (Wright.) (v, 1886) .                                                                                        | 655           |
| Purif. of Gases containing. (P) Price. (iv, 1885) .                                                                           | 332           |
| Reactions between Vegetable Soil and Atmospheric. (Berthelot.) (ix, 1890) .                                                   | 525           |
| Recovery of:                                                                                                                  |               |
| (P) Mathieson and Hawliczek. (vi, 1887) .                                                                                     | 290           |
| (P) Wilkinson. (ix, 1890) .                                                                                                   | 734           |
| (P) Zwilling. (x, 1891) .                                                                                                     | 129           |
| Recovery of, from Coal-Gas. (P) Hammond. (vi, 1887) .                                                                         | 719           |
| Recovery of, from Coke-Oven Gases. (Winkler.) (iii, 1884) .                                                                   | 512, 562      |
| Recovery of, from Galvanising Wastes. (P) Richards. (v, 1883) .                                                               | 615           |
| Recovery of, from Nitrogenous Organic Substances. (P) Ernst. (i, 1882) .                                                      | 398           |
| Recovery of, from Sewage, &c. (P) Adeney. (x, 1891) .                                                                         | 1021          |
| Recovery of, from Sugar Liquors. (P) Steffens. (iii, 1884) .                                                                  | 113           |
| Recovery of, from Tin and Zinc Waste. (P) Reinecken. (iv, 1885) .                                                             | 404           |
| Recovery of, from Tin-Plate Refuse. (P) Poengsen. (iii, 1884) .                                                               | 415           |
| Recovery of, in Soda Manufacture:                                                                                             |               |
| (P) Cheesbrough. From Hawliczek. (v, 1886) .                                                                                  | 428           |
| (P) Parnell and Simpson. (iv, 1885) .                                                                                         | 595           |
| Reduction of Nitric Acid to. (Boyer.) (ix, 1890) .                                                                            | 897           |
| Removal of, from Coal-Gas. (Bunte.) (i, 1882) .                                                                               | 314           |
| Role of, in the Nutrition of Plants. (Muntz.) (ix, 1890) .                                                                    | 200           |
| Salts, Action of Soda, Lime, and Magnesia on. (Lunge.) (ii, 1883) .                                                           | 514           |
| Salts, App. for Making. (P) Arrol and Meikle. (iv, 1885) .                                                                    | 118           |
| Salts from Combustible Gases, Obtaining. (P) Addie. From Addie. (iii, 1884) .                                                 | 159           |
| Salts in Dresden. (T.R.) (vii, 1888) .                                                                                        | 648           |
| Salts, Manurial Value of Nitrogen in the Form of. (Klein.) (vii, 1888) .                                                      | 332           |
| Salts, Nitritification of, in Soils. (Landolt.) (vii, 1888) .                                                                 | 760           |
| Salts, Prevention of Froth and Spurring in Treatment of. (P) Société Anonyme des Produits Chimiques du Sud-Ouest. (i, 1882) . | 408           |
| Separation of, from Coal-Gas. (P) Hepworth and Marriott. (vi, 1887) .                                                         | 364           |
| Separation of, from Gaseous Mixtures. (Wellstein.) (iv, 1885) .                                                               | 198           |
| -Soda and Leblanc Processes for Decomposing Salt. (xi, 1892) .                                                                | 681           |
| -Soda, Consumption of Material in the Manufacture of. (Schreib.) (xiv, 1895) .                                                | 151           |
| -Soda Industry, Position of the. (Hasenclever.) (vi, 1887) .                                                                  | 663           |
| -Soda Manufacture combined with Leblanc Process. (P) Schaffner and Helbig. (i, 1882) .                                        | 408           |
| -Soda Process. (P) Schuchtermann and Koeke. (ii, 1883) .                                                                      | 349           |
| -Soda Process, Apparatus for use in:                                                                                          |               |
| (P) Luray. From La Société pour l'Etude et la Création de Soudières. (vi, 1887) .                                             | 440           |
| (P) Vivian and Bell. (x, 1891) .                                                                                              | 640           |
| -Soda Process, Calcination of Sodium Bicarbonate obtained in. (P) Solvay. (i, 1882) .                                         | 26            |
| -Soda Process, Chemistry of the. (Schreib.) (vii, 1888) .                                                                     | 434           |
| -Soda Process, Chlorine from By-Products of. (P) Thompson. From Solvay. (v, 1886) .                                           | 451           |
| -Soda Process, Commercial Production of Chlorine by. (Bale.) (xiii, 1894) .                                                   | 260           |
| -Soda Process, Distilling Apparatus, Machinery, and Consumption of Steam in the. (Fassbender.) (xii, 1893) .                  | 601, 679, 681 |
| -Soda Process, History of the. (Lucion.) (viii, 1889) .                                                                       | 460           |
| -Soda Process, Influence of, on Value of HCl and Chlorine. (Weldon.) (ii, 1883) .                                             | 434           |
| -Soda Process, Mond's Communication on. (Scheurer-Kestner.) (v, 1886) .                                                       | 322           |
| -Soda Process, Origin of the. (Mond.) (iv, 1885) .                                                                            | 527           |
| -Soda Process, Production of Calcium Sulphate from Waste Liquors of. (Schreib.) (xii, 1893) .                                 | 445           |
| -Soda Process, Separation of Ammonium Chloride from Liquors of. (P) Jarmay. (vi, 1887) .                                      | 546           |
| -Soda Process, Treatment of Liquors produced in. (P) Mond. (iii, 1884) .                                                      | 259           |
| -Soda Processes. (Schreib.) (ix, 1890) .                                                                                      | 64            |

| -Soda Waste, Utilisation of. (x, 1891) .                                                            | 766      |
| Solution, Oxidising Action of, on Metals. (Hodgkinson and Bellairs.) (xiv, 1895) .                  | 160      |
| Solution, Presence of Lead in. (Lowry.) (xi, 1892) .                                                | 133      |
| Solutions, Preparation of Caustic. (P) Young. (vi, 1887) .                                          | 135      |
| Sources of. (Pennock.) (xii, 1893) .                                                                | 586      |
| Specific Gravity of Aqueous. (i, 1882) .                                                            | 5        |
| Specific Gravity of Solutions of. (Lunge and Wiernik.) (viii, 1889) .                               | 541      |
| Specific Gravity Table for Solutions of. (Smith.) (ii, 1883) .                                      | 80       |
| Still for Liquids containing. (P) Barlow. From Gareis. (ii, 1883) .                                 | 329      |
| Still, Supply of Liquor to. (P) Meldrum. (xii, 1893) .                                              | 155      |
| Sulphate of, Obtaining Free Ammonia from. (P) Carey, Gaskell, and Hurter. (iv, 1885) .              | 281      |
| Sulphite and Bisulphite of, Manuf. of. (P) Beck. (vii, 1888) .                                      | 629      |
| Tar, and Heating Gas, Simultaneous Prod. of. (Hennin.) (xi, 1892) .                                 | 233      |
| Test for Tar Products in. (Bernbeck.) (x, 1891) .                                                   | 104      |
| Transformation of Nitrogen into. (Scheurer-Kestner.) (ii, 1883) .                                   | 407      |
| Treatment of Coal for Obtaining of. (P) Young and Beily. (ii, 1883) .                               | 373      |
| Treatment of Gases containing. (P) Bolton and Wanklyn. (ii, 1883) .                                 | 167      |
| Treatment of Solutions containing Compounds of. (P) McDougall. (iii, 1884) .                        | 423      |
| Use of Standard Solutions of. (Rempel.) (viii, 1889) .                                              | 820      |
| In Products of Combustion of Coal, Utilisation of. (P) Darby. (iii, 1884) .                         | 163      |
| Washers for Extraction of, from Coal-Gas. (P) Cripps. (xiii, 1894) .                                | 379      |
| Yield of, by Dry Distill. of Fuel. (Tichauer.) (xiv, 1895) .                                        | 143      |
| Ammonias, Determination of, in Filter Sand and Sewage. (Hazen.) (ix, 1890) .                        | 1070     |
| Ammoniacal Calcic Phosphate, Manuf. of. (P) Gabet. (ix, 1890) .                                     | 292      |
| Compounds, Expansion of, from Sulphuric Acid. (Moritz.) (ix, 1890) .                                | 413      |
| Liquids, Apparatus for Distillation and Purification of. (P) Chevalet. (vii, 1887) .                | 597      |
| Liquor, Notes on. (Cox.) (iii, 1884) .                                                              | 158      |
| Liquor of Gasworks. (Dyson.) (ii, 1883) .                                                           | 229      |
| Liquor, Valves for. (P) Cripps. (xiii, 1894) .                                                      | 508      |
| Liquors, Apparatus for Distillation of:                                                             |          |
| (P) Dempster. (v, 1886) .                                                                           | 379      |
| (P) Ellis. (ix, 1890) .                                                                             | 734      |
| (P) Feldmann. (ii, 1883) .                                                                          | 380      |
| (P) Pettigrew. (xiii, 1894) .                                                                       | 734      |
| (P) Solvay and Co. (ix, 1890) .                                                                     | 622      |
| (P) Spence and Gilchrist. (xiii, 1894) .                                                            | 394      |
| Liquors, Distillation of. (P) Croll. (vi, 1887) .                                                   | 820      |
| Liquors, Separating Tar from. (P) Dempster. (ii, 1883) .                                            | 167      |
| Products, App. for Manuf. of. (P) Brin. (iii, 1884) .                                               | 173      |
| Products, Separation of, from Furnace Gases. (P) Mond. (v, 1886) .                                  | 235      |
| Ruthenium Oxysulphide, Dyeing Properties of. (Nicolle and Cantacuzene.) (xii, 1893) .               | 872      |
| Salts, Manuf. of. (P) Bowen. (ix, 1890) .                                                           | 1129     |
| Solution, Non-appearance of Multi-rotation of Carbohydrates in. (Schulze and Tollens.) (xi, 1892) . | 944      |
| Vapours, Test for. (i, 1882) .                                                                      | 203      |
| Ammonine, Customs Classification of, in Austria-Hungary. (T.R.) (viii, 1889) .                      | 1017     |
| Ammonio-Cobaltic Molybdate, Tungstate, &c. (Carnot.) (viii, 1889) .                                 | 923      |
| -Cupric Oxide, Stains caused by. (Wolter.) (xiii, 1894) .                                           | 946      |
| -Magnesium Carbonate, Preparation of Magnesia from. (P) Wunsche. (i, 1882) .                        | 409      |
| -Mercuric Chlorides. (André.) (viii, 1889) .                                                        | 915, 916 |
| -Zinc Chlorides. (Thoms.) (vi, 1887) .                                                              | 544      |
| Ammonium Acetate, Preparation of, for Manufacture of White Lead. (P) Smith. (xii, 1893) .           | 42       |
| Alkinate. (Stanford.) (v, 1886) .                                                                   | 219      |
| And Mercury Compounds. (Rammelsberg.) (viii, 1889) .                                                | 241      |
| And Rubidium Double Bromide. (ix, 1890) .                                                           | 888      |
| Bases, Hexamethyltriimidodiphenylmethane. (Rosenstiehl.) (xiv, 1895) .                              | 859      |
| Bicarbonate and Formate, Production of. (P) Rogatien. (xii, 1893) .                                 | 864      |
| Bichromate, Manufacture of. (P) Hood. (v, 1886) .                                                   | 487      |
| Bromide. (Thunmel.) (vii, 1889) .                                                                   | 210, 636 |
| Carbonate for Fixing Alumina Mordants. (Wolf.) (iv, 1885) .                                         | 586      |
| Carbonate, German Trade in. (T.R.) (xiii, 1894) .                                                   | 1111     |
| Carbonate, Manufacture of:                                                                          |          |
| (P) Parnell and Simpson. (vii, 1888) .                                                              | 629      |
| (P) Raspe. (xiii, 1894), 394; (xiv, 1895) .                                                         | 1046     |
| Carbonate, Manufacture of, for Baking Powder. (P) Chatfield. (viii, 1889) .                         | 392      |
| Carbonate of, Prod. of. (P) Gedze. From Glaser. (iv, 1885) .                                        | 118      |
| Carbonate, Packages for. (P) Needham. (x, 1891) .                                                   | 642      |
| Carbonate Solution, Oxidation of Copper in Presence of. (Traube.) (iv, 1885) .                      | 677      |
| Carbonate, Table of Specific Gravities for Solutions of. (Smith.) (ii, 1883) .                      | 81       |
| Carbonate, Use of, for Mordants on Cotton. (Wolf.) (v, 1886) .                                      | 165      |
| Carbonates of, Production of. (P) Claus. (viii, 1889) .                                             | 779      |
| Chloral-. (vii, 1889) .                                                                             | 413      |
| Chloride, Action of Ammonia on Solubility of. (Engel.) (xi, 1892) .                                 | 238      |

| Ammonium—cont.                                                                                                               | PAGE                  |     |

| Coating Iron with. (P.) Cookson. (viii, 1889).....                                                     | 466  |
| Compounds, Fixation of Aniline Dyes with. (v, 1886).....                                               | 97   |
| Compounds used in Dyeing and Printing. (Gerland.) (iv, 1885).....                                      | 643  |
| Detection of, in Minerals. (Johnstone.) (viii, 1889).....                                              | 215  |
| Determination of, as Amalgam. (Vortmann.) (x, 1891).....                                               | 1056 |
| Determin. of, by Marsh's Method. (Bylert.) (ix, 1890).....                                             | 1153 |
| Determination of Gold and Silver in. (Smith.) (xii, 1893).....                                         | 316  |
| Determination of, in Antimonial Pyrites. (Cloud and Rogers.) (xiv, 1895).....                          | 303  |
| Discovery of Native, in California. (T.R.) (xiii, 1894).....                                           | 78   |
| Electrolytic Estimation of. (Leclercq.) (ix, 1890).....                                                | 108  |
| Electrolytic Reduction of. (Borchers.) (vi, 1887).....                                                 | 673  |
| Estimation of:                                                                                         |      |
| (Kohn.) (x, 1891).....                                                                                 | 327  |
| (Paul.) (xii, 1893).....                                                                               | 61   |
| Estimation of, as Antimony Tri-oxide. (Brunck.) (xiv, 1895).....                                       | 771  |
| Extraction of:                                                                                         |      |
| (Hering.) (xii, 1893).....                                                                             | 272  |
| (P.) Shannon. (vii, 1888).....                                                                         | 36   |
| (P.) Warwick. (xi, 1892).....                                                                          | 533  |
| Fluoride and Ammonium Sulphate, Double Salt of. (Frey.) (vii, 1888).....                               | 566  |
| Fluoride and Ammonium Sulphate, Fixing Tannin by. (Dollfus.) (vii, 1888).....                          | 206  |
| Fluoride, Manufacture of Compounds of, for Dyeing. (P.) Thompson. From De Haen. (vi, 1887).....        | 727  |
| Hydrate, Use of, for Fixing Aniline Colours. (Kertész.) (v, 1886).....                                 | 165  |
| In Bolivia. (T.R.) (xiii, 1894).....                                                                   | 912  |
| In Coloured Fabrics. (Kaysner.) (ii, 1883).....                                                        | 346  |
| In Nevada. (x, 1891).....                                                                              | 1010 |
| In New South Wales. (T.R.) (xii, 1893).....                                                            | 959  |
| In Portugal. (T.R.) (vi, 1887).....                                                                    | 530  |
| In Presence of Tin, Volumetric Estimation of. (Herrou.) (i, 1882).....                                 | 203  |
| In the United States. (T.R.) (vii, 1888).....                                                          | 600  |
| In Turkey. (T.R.)..... (vii, 1888), 245; (ix, 1890).....                                               | 120  |
| Influence of, on Copper. (Hampe.) (xi, 1892).....                                                      | 1014 |
| Manufacture of Double Salts containing Constant Amount of. (P.) Thompson. From Mayer. (xii, 1893)..... | 785  |
| Mine in New South Wales. (T.R.) (xiii, 1894).....                                                      | 78   |
| Mines in France. (ix, 1890).....                                                                       | 1039 |
| Mining and Smelting in Japan. (T.R.) (xii, 1893).....                                                  | 1075 |
| Mining in New Zealand. (T.R.) (ix, 1895).....                                                          | 612  |
| Mining in Portugal. (Vogel.) (x, 1891).....                                                            | 837  |
| Mordant, A New. (Frey.) (vii, 1888).....                                                               | 207  |
| Mordant from Whey. (Kretschmar.) (vii, 1888).....                                                      | 623  |
| Mordants, Use of. (Forth.) (v, 1886).....                                                              | 301  |
| Ore, Dry Concentration of. (Heard.) (viii, 1889).....                                                  | 399  |
| Ore, Tenders for Purchase of, from Servia. (T.R.) (ix, 1890).....                                      | 1164 |
| Ores, Analysis of. (Carnot.) (xi, 1892).....                                                           | 636  |
| Ores, Assay of. (Carnot.) (xi, 1892).....                                                              | 941  |
| Ores, Gold and Silver from Sulphide of. (P.) Simpson and Parrell. (iv, 1885).....                      | 352  |
| Ores in Spain. (T.R.) (ix, 1890).....                                                                  | 428  |
| Ores, Reduction of. (P.) Alzamaray. (xii, 1893).....                                                   | 931  |
| Ores, Treatment of:                                                                                    |      |
| (P.) Beveridge. (iii, 1884).....                                                                       | 447  |
| (P.) Butterfield. (iii, 1884).....                                                                     | 180  |
| (P.) Schreiber and Knutsen. (ix, 1890).....                                                            | 195  |
| Oxalate. (v, 1886).....                                                                                | 239  |
| Oxalate and Tartar Emetic as Mordants. (Hirzel.) (iv, 1885).....                                       | 400  |
| Oxalate as a Mordant:                                                                                  |      |
| (Botsch.) (v, 1886).....                                                                               | 239  |
| (Lauber and Schweikert.) (v, 1886).....                                                                | 165  |
| Oxalate, Use of, in Printing. (Jaquet.) (iv, 1885).....                                                | 493  |
| Oxide, Colour Reaction for. (Levy.) (vi, 1887).....                                                    | 387  |
| Oxide, Solubility of. (Kohler.) (v, 1886).....                                                         | 165  |
| Pentachloride. (Anschutz and Evans.) (vi, 1887).....                                                   | 546  |
| Pentasulphide. (Wilnt.)..... (x, 1891), 1035; (xi, 1892).....                                          | 758  |
| Potassium Oxalate, Estimation of. (Setlicks.) (v, 1886).....                                           | 596  |
| Prices of. (T.R.) (xi, 1892).....                                                                      | 81   |
| Production in Banya. (Balling.) (v, 1886).....                                                         | 671  |
| Prod. of. (P.) Abel. From Koepf and Co. (xii, 1893).....                                               | 523  |

|                                                                                                                             |      |
|-----------------------------------------------------------------------------------------------------------------------------|------|
| Antimony—cont.                                                                                                              |      |
| Prod. of, from Poor Ores, &c. (P.) Hering. (iii, 1884).....                                                                 | 486  |
| Production of, in Blast Furnaces. (Balling.) (v, 1886).....                                                                 | 328  |
| Red, Composition of. (Baubigny.) (xiv, 1895).....                                                                           | 373  |
| Regulus, Extraction of, from Ore. (P.) Cummins. From Schweder. (vi, 1887).....                                              | 731  |
| Salt as Substitute for Tartar Emetic. (Paterson.) (viii, 1889).....                                                         | 612  |
| Salts, Applic. of, in Cotton Dyeing. (Lange.) (viii, 1889).....                                                             | 188  |
| Separation and Estimation of. (Thiele.) (x, 1891).....                                                                      | 857  |
| Separation of Arsenic from. (Hufschmidt.) (iii, 1884).....                                                                  | 649  |
| Separation of Bismuth from. (Matthey.) (xii, 1893).....                                                                     | 159  |
| Separation of Copper from. (Finkener.) (viii, 1889).....                                                                    | 733  |
| Separation of, from Gold. (P.) Sanderson. (ix, 1890).....                                                                   | 952  |
| Separation of, from HCl, &c. (P.) Whitehead and Gies-tharp. (xiv, 1895).....                                                | 805  |
| Separation of, from other Metals:                                                                                           |      |
| (Dirvell.) (vi, 1887).....                                                                                                  | 384  |
| (Jannasch.) (xiv, 1895).....                                                                                                | 510  |
| Separation of Gold and Platinum from. (Koninek and Leclercq.) (vii, 1888).....                                              | 693  |
| Separation of Lead from, by Bromine. (Jannisch and Remmler.) (xiii, 1894).....                                              | 66   |
| Separation of Tin from:                                                                                                     |      |
| (Clason and Schelle.) (viii, 1889).....                                                                                     | 137  |
| (Warren.) (vii, 1888).....                                                                                                  | 457  |
| Smelting, English Process of. (Rodger.) (xi, 1892).....                                                                     | 16   |
| Sodium Fluoride, Analysis of. (Stein.) (vii, 1888).....                                                                     | 133  |
| Sulphide, Action of Hydrochloric Acid on. (Lang.) (v, 1886).....                                                            | 30   |
| Sulphide, Action of Hydrogen Peroxide on. (Ruschig.) (v, 1886).....                                                         | 39   |
| Sulphide, Discovery of, at Batz. (i, 1882).....                                                                             | 216  |

| (Puseher.) (i, 1882)                                                                     | 504       |
| Arginine. (Schulze and Steiger.) (vi, 1887)                                              | 380       |
| Argol, Determining Tartaric Acid in. (Bornträger.) (v, 1886)                             | 497       |
| Methods for Valuation of. (Boessneck.) (viii, 1889)                                      | 420       |
| Shipments from Ancona, in Italy. (T.R.) (vii, 1888)                                      | 462       |
| Aricine, Preparation and Properties of. (Moissan and Landrin.) (ix, 1890)                | 613, 1061 |
| Aristol, Constitution of. (Berlinger.) (x, 1891)                                         | 569       |
| Arkansas, Production of Bauxite in. (T.R.) (x, 1891)                                     | 304       |
| Arlo's Plant for Manuf. of Matches. (Arlo.) (iii, 1884)                                  | 377, 378  |
| Armour-Plates, Carburetting Surfaces of. (P) Stubbs. (xiv, 1895)                         | 871       |
| Manufacture of:                                                                          |           |
| (P) Inray. From Carey. (xiv, 1895)                                                       | 755       |
| (P) Reichwald. From Krupp. (xiv, 1895)                                                   | 755       |
| (P) Rensch. (ii, 1883)                                                                   | 40        |
| (P) Rogerson. (xiv, 1895)                                                                | 754       |
| Tests of Nickel Steel. (T.R.) (x, 1891)                                                  | 868       |
| Arnica, Falsification of. (Menier.) (i, 1882)                                            | 466       |
| Aromatic Bases, Action of, on Manganese Brown. (Rettig.) (v, 1886)                       | 482       |
| Compounds, Halogens in the Side Chains of. (Schulze.) (iii, 1884)                        | 455       |
| Products, Making and Preserving Extract of. (P) Armstrong. (iv, 1885)                    | 133       |
| Aromatics, Manufacture of. (P) Tiemann. (xiii, 1894)                                     | 903       |
| Arrack, Manufacture of, in Batavia, Microbiological Notes on. (Eijkmann.) (xiv, 1895)    | 174       |
| Arrow Poisons of Malacca. (Santesson.) (xiv, 1895)                                       | 384       |
| Arrowroot Manufacture in Queensland. (i, 1882)                                           | 414       |
| Starch, Manufacture of. (Macdonald.) (vi, 1887)                                          | 334       |
| Arsenates, Obtaining. (P) Huggenberg. (vii, 1888)                                        | 673       |
| Oxalic Acid as a Test for. (Patromillard.) (i, 1882)                                     | 516       |
| Arsenic Acid, Estimation of. (Younger.) (ix, 1890)                                       | 158       |
| Acid, Preparation of. (iv, 1885)                                                         | 592       |
| Acid, Titration of. (Joly.) (v, 1886)                                                    | 391, 510  |
| Alginate. (Stanford.) (v, 1886)                                                          | 220       |
| And Antimony, Separation of. (Koehler.) (ix, 1890)                                       | 708       |
| And its Oxide, Colour Reactions for. (Levy.) (vi, 1887)                                  | 387       |
| Antimony and Tin, Quant. Separ. of. (Hampe.) (xiv, 1895)                                 | 302       |
| Antimony and Tin, Separation of. (Clark.) (xi, 1892)                                     | 461       |
| Antimony, &c., Separation of, from HCl, &c. (P) Whitehead and Gelstharp. (xiv, 1895)     | 865       |
| Apparatus for Manuf. of White. (P) Oxland. (v, 1886)                                     | 428       |
| Beckurt's Method for Detection of. (Baumert.) (iv, 1885)                                 | 554       |
| Compounds, Action of, on Vegetable Protoplasm. (Loew.) (ii, 1884)                        | 327       |
| Deposition of, as Amalgam. (Vortmann.) (x, 1891)                                         | 1036      |
| Detection and Separ. of. (Gooch and Hodge.) (xiii, 1894)                                 | 979       |
| Detection of:                                                                            |           |
| (Hager.) (iii, 1884)                                                                     | 580       |
| (Thiele.) (x, 1891)                                                                      | 950       |
| Detection of, by Electrolytic Evolution of Arseniuretted Hydrogen. (Wolff.) (vi, 1887)   | 147       |
| Detection of, by the Microscope. (Hager.) (ii, 1883)                                     | 237       |
| Detection of, by Thiocetic Acid. (Schiff.) (xiv, 1895)                                   | 889       |
| Detection of, in Alkaline Solution. (Clark.) (xii, 1893)                                 | 549       |
| Detection of, in Hydrochloric Acid and Copper. (Hager.) (v, 1886)                        | 617       |
| Detection of, in Metallic Iron. (Sautermeister.) (x, 1891)                               | 949       |
| Detection of, in Native Copper. (Kuhn.) (iii, 1884)                                      | 374       |
| Determ. of, as the Pentasulphide. (McKay.) (vi, 1887)                                    | 504       |
| Determination of, by Berzelius-Marsh Process. (Sanger.) (xi, 1892)                       | 370       |
| Determination of, by Marsh's Method. (Kuhn and Saeger.) (ix, 1890)                       | 1152      |
| Determination of, in Iron. (Gronsdahl.) (v, 1886)                                        | 547       |
| Determ. of, in Iron and Steel. (Mignot.) (xiv, 1895)                                     | 1064      |
| Determination of, in Iron Ores, Steel, and Pig Iron. (Stend.) (xiv, 1895)                | 444       |
| Determination of, in Sulphides. (Jannasch.) (xiii, 1894)                                 | 905       |
| Direct Estim. of, in Minerals, &c. (Clark.) (x, 1891)                                    | 444       |
| Effect of, on Steel. (Stend.) (xiv, 1895)                                                | 579       |
| Electrolytic Separation of Copper, Bismuth, and Mercury from. (Schmucker.) (xii, 1894)   | 280       |
| Elimination and Recovery of, from Copper Precipitates. (P) North. (xiii, 1894)           | 1201      |
| Elimination of, from Hydrochloric Acid. (Otto.) (v, 1886)                                | 602       |
| Estimation of, in Concentrated Sulphuric Acid. (Stepanow and Miklaschewski.) (xiv, 1895) | 188       |
| Estim. of, in Fabrics. (Fresenius and Hintz.) (vii, 1888)                                | 456       |
| Estimation of, in Ores:                                                                  |           |
| (Lehmann and Mager.) (v, 1886)                                                           | 510       |
| (Pattinson.) (xii, 1893)                                                                 | 119       |
| Estimation of, in Precipitated Calcium Phosphate. (Fresenius.) (viii, 1889)              | 62        |
| Estimation of Small Quantities of. (Carnot.) (xiv, 1895)                                 | 888       |
| Extraction of Dangerous Compounds of. (P) Tooth and Rooker. (iv, 1885)                   | 459       |
| Freeing Copper from. (P) Stone. (xii, 1893)                                              | 524       |
| In Chloroform. (Scholven.) (vi, 1887)                                                    | 382       |
| In Commercial Acids. (Buchner.) (x, 1891)                                                | 460       |
| In Copper, Determination of. (Pattinson.) (i, 1882)                                      | 339       |
| In Copper, Ferric Chloride Process for Estimation of. (Platten.) (xiii, 1894)            | 324       |

## Arsenic—cont.

|                                                                                                                        |          |
|------------------------------------------------------------------------------------------------------------------------|----------|
| In Crude Acids. (x, 1891)                                                                                              | 575      |
| In Dresden. (T.R.) (vii, 1888)                                                                                         | 649      |
| In Ferric Chloride Solution. (Buchner.) (vi, 1887)                                                                     | 522      |
| In Glycerin:                                                                                                           |          |
| (Siebold.) (viii, 1889)                                                                                                | 726      |
| (Vulpus.) (viii, 1889)                                                                                                 | 639      |
| In Imported Hides. (xiv, 1895)                                                                                         | 774      |
| In Matches. (Meißner.) (vi, 1887)                                                                                      | 522      |
| In New Zealand. (T.R.) (xii, 1893)                                                                                     | 881      |
| In Phosphorus. (Hampe.) (x, 1891)                                                                                      | 490      |
| In Pyrites, Estimating:                                                                                                |          |
| (Clark.) (vi, 1887)                                                                                                    | 352      |
| (Nahlsen.) (vi, 1887)                                                                                                  | 504      |

| (P) Holzer. (ii, 1883) .....                                                             | 187  |
| (P) Mayer. (ii, 1883) .....                                                              | 187  |
| Danger to, by Careless Pitching of Casks. (Greber.) (xiv, 1895) .....                    | 670  |
| Decolorisation of, by Saccharin. (Reinke.) (vii, 1888) ..                                | 449  |
| Decolorising, with Animal Charcoal. (Kraetzer.) (i, 1882) .....                          | 332  |
| Detection of Liquorice in. (Hager.) (v, 1886) .....                                      | 508  |
| Detection of Saccharine in:                                                              |      |
| (Hantter.) (xii, 1893) .....                                                             | 628  |
| (Spaeth.) (xii, 1893) .....                                                              | 1064 |
| Detection of Salicylic Acid in:                                                          |      |
| (Pinette.) (x, 1891) .....                                                               | 165  |
| (Rose.) (v, 1886) .....                                                                  | 618  |
| Determination of Dry Substance in. (Ehion.) (xiv, 1895) ..                               | 691  |
| Disappearance of Salicylic Acid and Saccharine from. (Waufers.) (xiii, 1894) .....       | 969  |
| Effect of Albuminoids in Manufacture of. (Wahl and Nilson.) (xiii, 1894) .....           | 896  |
| Effect of Alkali Chlorides on Flavour of. (xiii, 1894) ..                                | 1080 |
| Effect of Drying on the Composition of Malt, Wort, and. (Matz.) (viii, 1889) .....       | 240  |
| Effect of Water on the Quality of. (Windisch.) (vii, 1888) .....                         | 346  |
| Effects of Saline Constituents of Water on Character of. (Readman.) (xiii, 1894) .....   | 367  |
| Electric Treatment of. (P) Wagner and Marr. (xiv, 1895) .....                            | 280  |
| Estimation of by Maltometer. (Sidersky.) (xii, 1893) ..                                  | 952  |
| Estimation of Carbonic Acid in. (Crampton and Trescot.) (vi, 1887) .....                 | 839  |
| Estimation of Glycerin in:                                                               |      |
| (Partheil.) (xiv, 1895) .....                                                            | 1071 |
| (Skalweit.) (v, 1886) .....                                                              | 457  |
| Estimation of Intensity of Colour of. (Cerny.) (xii, 1893) ..                            | 940  |
| Evolution of Carbon Dioxide and Hydrogen Sulphide in Boiling. (Ehion.) (xii, 1894) ..... | 267  |
| Examination of. (Bertschinger.) (x, 1891) .....                                          | 274  |
| Export of. (Reinke.) (vii, 1888) .....                                                   | 858  |
| Fermentation and Manuf. of. (P) Loder. (iv, 1885) .....                                  | 238  |
| Fermentation of:                                                                         |      |
| (P) Kropf and Gruell. (xiv, 1895) .....                                                  | 476  |
| (P) Salomon. (x, 1891) .....                                                             | 378  |
| (P) Wirth. From Keillen. (iii, 1884) .....                                               | 189  |
| Filter for. (Stockheim.) (vi, 1887) .....                                                | 555  |
| Finishing. (P) Witteman. (xi, 1892) .....                                                | 932  |
| Gluten Precipitates in. (Will.) (xiii, 1894) .....                                       | 867  |
| Gluten-Precipitate in. (Michel.) (iii, 1884) .....                                       | 646  |
| Glycerin in. (Amthor.) (ii, 1883) .....                                                  | 187  |

## Beer—cont.

|                                                                                             |          |
|---------------------------------------------------------------------------------------------|----------|
| Impregnating, with Carbonic Acid. (P) Mills. From Universal Carbonating Co. (xi, 1892)..... | 833      |
| In the Philippine Islands. (T.R.) (x, 1891).....                                            | 73       |
| Industry of Austria-Hungary. (T.R.) (xiv, 1895).....                                        | 1077     |
| Influence of Carbonic Acid on Fermentation and Keeping of. (Debruck.) (vi, 1887).....       | 555, 734 |
| Influence of Dinstose on. (Windisch.) (xii, 1893).....                                      | 368      |
| Influence of Hop-Resins on Fermentation of. (Hayduck.) (xii, 1893).....                     | 368      |
| Influence of Hop-Tannin on. (Hayduck and Goldiner.) (xiii, 1894).....                       | 967      |
| Influence of Hops on Keeping Properties of. (Hayduck.) (iv, 1885).....                      | 683      |
| Influence of Malting Temperature on. (Matz and Baleke.) (vii, 1888).....                    | 859      |
| Influence of Mashing Process on Attenuation of. (Windisch.) (xiii, 1894).....               | 967      |
| Influence of Water on Colour of. (Mierau.) (xiv, 1895).....                                 | 668      |
| Invertase in. (Donath.) (xi, 1892).....                                                     | 543      |
| Iso-Maltose in. (Lintner.) (xi, 1892).....                                                  | 171      |
| Lager. (Graham.) (First Proceedings).....                                                   | 15       |
| Manufacture of:                                                                             |          |
| (P) Billings. (xiv, 1895).....                                                              | 765      |
| (P) Boulé. From Pfander Vacuum Fermentation Co. (xi, 1892).....                             | 629, 629 |
| (P) Brown, Morris, and Moritz. (ix, 1890).....                                              | 1057     |
| (P) Frisch. (viii, 1889).....                                                               | 996      |
| (P) Hillyard and Dugdale. (xi, 1892).....                                                   | 1022     |
| (P) Justice. From Billings. (iv, 1885), 685; (xi, 1892).....                                | 628      |
| (P) Lake. From Tedesco. (xiii, 1894).....                                                   | 896      |
| (P) Pennington. (xiii, 1894).....                                                           | 656      |
| (P) Pikhart. (xiii, 1894).....                                                              | 535      |
| (P) Roche. (xi, 1892).....                                                                  | 1022     |
| (P) Thompson. From Lawton. (xi, 1892).....                                                  | 628, 629 |
| (P) Thompson. From Pfander. (vii, 1888).....                                                | 859      |
| (P) Wise. From Antheaume. (xii, 1893).....                                                  | 369      |
| Manufacture of Amyloins for Treating. (P) Brown and others. (x, 1891).....                  | 265      |
| Manufacture of, and Apparatus therefor. (P) Wagner and Marr. (xiv, 1895).....               | 55       |
| Mannf. of Beverages resembling. (P) Ety. (iv, 1885).....                                    | 507      |
| Manufacture of Finings for. (P) Blum. (ii, 1883).....                                       | 390      |
| Manufacture of, from Maize. (x, 1891).....                                                  | 719      |
| (P) Lake. From Feroe. (v, 1886).....                                                        | 453      |
| Manufactured from Pure Yeast, Chemical Characteristics of. (Bergmann.) (vi, 1887).....      | 47       |
| Mashing and Brewing. (P) Barton. (xi, 1892).....                                            | 833      |
| Method and Apparatus for Brewing. (P) Quertain and Becker. (xi, 1892).....                  | 449      |
| Micro-organisms causing Diseases of. (Fellowes.) (xiii, 1894).....                          | 1080     |
| Mode and App. for Cleansing. (P) Southby. (iv, 1885).....                                   | 414      |
| Munich and Berlin White. (Wein.) (vii, 1888).....                                           | 336      |
| Occurrence of Boric Acid in. (Braun.) (xii, 1893), 535; (xiii, 1894), 54                    |          |
| Of the last Century, Analysis of a. (Brown and Morris.) (ix, 1890).....                     | 533      |
| Pasteurisation of:                                                                          |          |
| (P) Kuhn. (ix, 1890).....                                                                   | 1056     |
| (Schwarz.) (iii, 1884).....                                                                 | 188      |
| Preparation for Fining, &c. (P) Reade. (x, 1891).....                                       | 651      |
| Preparations for Use in Brewing and Treating. (P) Spencer. (xiv, 1895).....                 | 673      |
| Preservation of. (P) Boulé. From Otto and Schwerdtfeger. (ix, 1890).....                    | 204      |
| Preventing Turbidity of. (Reinke.) (vi, 1887).....                                          | 144      |
| Prod. of Coconut and Rice. (Culmette.) (xiii, 1894).....                                    | 268      |
| Production of, in France. (T.R.) (xii, 1893).....                                           | 1074     |
| Production of Non-Alcoholic. (P) Hoff. (x, 1891).....                                       | 719      |
| Progress in Brewing. (Lintner.) (viii, 1889).....                                           | 56       |
| Raising, by Means of Carbonic Acid Gas. (P) Boulé. From Lauer. (iii, 1884).....             | 598      |
| Report on, from Breslau Analytical Station. (Fisher and others.) (xii, 1893).....           | 536      |
| Returns, Method and Apparatus for Treating. (P) Faulkner and Wilson. (v, 1886).....         | 434      |
| Root. Composition of. (P) Becker. (i, 1882).....                                            | 197      |
| Salt in. (Moritz.) (xii, 1893).....                                                         | 367      |
| Sarcina. (Reichard.) (xiv, 1895).....                                                       | 289      |

| Corrosion in Steam:                                                                                  |      |
| (Böhm.) (vii, 1888).....                                                                             | 202  |
| (Paul.) (x, 1891).....                                                                               | 988  |
| Danger to, from Ferric Sulphate. (List.) (iii, 1884).....                                            | 462  |
| Electric Safety App. for Steam. (P) Tineme. (i, 1882).....                                           | 393  |
| Employed in Manufacture of Paper Pulp. (P) McDougall. (iii, 1884).....                               | 190  |
| Feed Regulators for Steam. (P) Monski. (ii, 1883).....                                               | 342  |
| Fireproof Cement for. (P) Taylor. (xii, 1893).....                                                   | 355  |
| Fluid for Prev. Incrustation in. (P) Coslett. (viii, 1889).....                                      | 971  |
| Fluid for Preventing or Removing Incrustation in. (P) Borecki and Komestik. (xiii, 1894).....        | 714  |
| For Fibrous Material. (P) Sinclair. (xii, 1893).....                                                 | 779  |
| For Manufacture of Cellulose. (P) Kellner. (x, 1891).....                                            | 62   |
| For Manufacture of Paper-Pulp:                                                                       |      |
| (P) Davies. From Kellner. (x, 1891).....                                                             | 268  |
| (P) McDougall. (v, 1886) 676; (vii, 1888).....                                                       | 451  |
| (P) Walton. (vi, 1887).....                                                                          | 223  |
| For Manuf. of Paper-Pulp, Linlog. (P) Kellner. (x, 1891) 380, 494                                    |      |
| For Treating Paper-making Materials. (P) Sinclair. (xiii, 1894).....                                 | 754  |
| For Treating Wood, in Manufacture of Paper. (P) Springer. (v, 1885).....                             | 433  |
| For Treating Wood-Pulp. (P) Otto. (iv, 1885).....                                                    | 415  |
| For Treating Wood, &c. with Acid Solutions. (P) Lundeborg. (viii, 1889).....                         | 304  |
| For Treating Wood with Acids. (P) Lake. From Flogdvist. (iv, 1885).....                              | 243  |
| Fusible Plugs for Steam. (P) Williams. (vi, 1887).....                                               | 649  |
| Gas Fire for Steam. (P) Berndt and Baldermann. (i, 1882).....                                        | 218  |
| Gas-firing for Steam. (P) Krottnauer. (ii, 1883).....                                                | 370  |
| Heating, Brewing with Gas. (P) Schafer. (i, 1882).....                                               | 421  |
| Heating, by Gaseous Fuel. (P) Murray. From Ware. (ix, 1890).....                                     | 170  |
| Ingot-Iron for Steam. (Kreuzpointer.) (vii, 1888).....                                               | 124  |
| Lagging for. (P) Clarkson. From The Mannheim Gummi, Gutta Percha and Asbest Fabrik. (xii, 1893)..... | 348  |
| Lined with Lead, &c. (P) McDougall, Hartley, and Sugden. (viii, 1889).....                           | 449  |
| Lining for Paper-Pulp. (P) Makin. (x, 1891).....                                                     | 157  |
| Loss of Heat in. (Schreuer-Kestner.) (xii, 1894).....                                                | 1049 |
| Luminous Floats for Indicating Water-Level of. (P) Schlag and Bevend. (i, 1882).....                 | 389  |
| Powder for Removing Incrustations in. (P) Allieri. (vii, 1888).....                                  | 313  |
| Preventing Formation of Scale in:                                                                    |      |
| (P) Aitken. (v, 1886).....                                                                           | 94   |
| (Walter.) (xiii, 1894).....                                                                          | 622  |
| Preventing Incrustation in Steam:                                                                    |      |
| (P) Fox. (vi, 1887).....                                                                             | 133  |
| (P) Gane. (xiii, 1894).....                                                                          | 504  |
| (P) Harrison. (ix, 1890).....                                                                        | 167  |
| (P) Lowe. (iii, 1884).....                                                                           | 435  |
| Prevention of Deposit in Feed Apparatus of Steam. (P) Arehbutt and Deeley. (xi, 1892).....           | 421  |

## Boilers—cont.

|                                                                                               |        |
|-----------------------------------------------------------------------------------------------|--------|
| Production of the Spheroidal State in. (Witz.) (xi, 1892).....                                | 667    |
| Purification of Feed-Water for. (Schreib.) (xii, 1893).....                                   | 26     |
| Reichling's Safety Apparatus for Steam. (v, 1886).....                                        | 445    |
| Removing Incrustation in. (P) Roberts. (v, 1886).....                                         | 454    |
| Scheurer-Kestner Experiments on use of Coal in. (Fischer.) (iii, 1884).....                   | 231    |
| Substance for Covering Steam. (P) Allison. From So-plus Döhlmann and Co. (iv, 1885).....      | 668    |
| Steam-. (P) Hesse. (xiv, 1895).....                                                           | 556    |
| Tannin Matters as Anti-Incrustators for. (Vignon.) (ix, 1890).....                            | 767    |
| Water Purification for Steam. (Gibault.) (xii, 1893).....                                     | 739    |
| Boiling, and Distilling, App. for. (Leather.) (viii, 1889).....                               | 81     |
| And Fusing Points, Determination of. (Le Chatelier.) (xiv, 1895).....                         | 821    |
| Apparatus for. (P) Lainz. (xii, 1893).....                                                    | 509    |
| Method of Preventing Tumultuous. (Pieszczyk.) (xi, 1892).....                                 | 181    |
| Point Determinations. (Schleiermacher.) (x, 1891).....                                        | 667    |
| Point, Distillation of Substances having a High. (P) Jaffe and Darmstadter. (xiii, 1894)..... | 239    |
| Points of Organic Bodies, Rule for Determination of. Wildermann. (ix, 1890).....              | 903    |
| Vessels, Method of Setting up. (Mangoldt.) (xiii, 1894).....                                  | 239    |
| Boldin: A New Hypnotiser. (Guranville.) (vii, 1888).....                                      | 585    |
| Boldin. (vii, 1888).....                                                                      | 866    |
| Bolivia, Antimony and Bismuth in. (T.R.) (xiii, 1894).....                                    | 912    |
| Caoutchouc in. (T.R.) (xiii, 1894).....                                                       | 678    |
| Cinchona Bark from the Mapiri River in. (Schafer.) (vii, 1888).....                           | 451    |
| Economic Condition of. (T.R.) (xii, 1893).....                                                | 298    |
| Industrial Openings in. (T.R.) (x, 1891).....                                                 | 1043   |
| Mineral Resources of. (T.R.) (x, 1891).....                                                   | 283    |
| Resources of. (T.R.) (x, 1891).....                                                           | 867    |
| Trade of. (T.R.) (vi, 1887).....                                                              | 463    |
| Bomb-Calorimeter, Description of. (Slosson and Colburn.) (xiv, 1895).....                     | 353    |
| Bombax Pentandrum. (Arnaud.) (xii, 1894).....                                                 | 147    |
| Bombay, Paper-making in. (T.R.) (xiv, 1895).....                                              | 836    |
| Bombyx Mori, Silk Secretion by. (Dubois.) (ix, 1890).....                                     | 1163   |
| Bone and Wood Burner. (P) Schafer. (ii, 1883).....                                            | 130    |
| Apparatus for Grinding. (P) Firth and Whitehead. (ix, 1890).....                              | 480    |
| Bone-Ash. Analysis of. (Weibull.) (xii, 1893).....                                            | 869    |
| Composition of. (Macadam.) (vii, 1888).....                                                   | 92, 94 |
| Manufacture of Phosphorus, &c. from. (P) Folie-Desjardins. (x, 1891).....                     | 642    |
| Bone-Black, Apparatus. (P) Barr. (ii, 1883).....                                              | 90     |
| Decarbonisation of. (Horne.) (xv, 1895).....                                                  | 977    |
| Furnace for Making. (P) Schafer. (ii, 1883).....                                              | 130    |
| Furnace for Revivifying. (P) Weber. (i, 1882) 463; (ix, 1890).....                            | 168    |
| Manuf. of. (P) Alexander. From Castner. (ii, 1883).....                                       | 239    |
| Production of Sugar without. (vi, 1887).....                                                  | 553    |
| Retorts used in Manufacture of. (P) Nepp. (i, 1882).....                                      | 445    |
| Revivifying. (P) Reddie. From Cheshbrough. (i, 1882).....                                     | 241    |
| Treatment and Revivification of. (P) Miller. (i, 1882).....                                   | 377    |
| Treatment of. (P) Degener and Lach. (iv, 1885).....                                           | 682    |
| Washing. (P) Lillie. (i, 1882).....                                                           | 513    |
| Bone-Dust, Ratio between Lime and Phosphoric Acid in. (Lookeren-Campagne.) (vii, 1888).....   | 222    |
| Slow Weathering of Crude. (Konig.) (iii, 1884).....                                           | 187    |
| Value of Nitrogen in. (iii, 1884).....                                                        | 185    |
| See also Bone-Meal.                                                                           |        |
| Bone-Earth, Decomposing, with Sulphuric Acid. (Stolba.) (vii, 1888).....                      | 333    |
| Bone Fat. (Valenta.) (vii, 1888).....                                                         | 219    |
| Analysis of, and Loss of Nitrogen in Manufacture. (Born-trager.) (vi, 1887).....              | 825    |
| Bone Flour, Composition of. (Macadam.) (vii, 1888).....                                       | 82     |
| Grinding, Avoiding Dangers of. (ix, 1890).....                                                | 272    |
| Manufacture of Lactate as a Substitute for. (P) Callender. (ix, 1890).....                    | 1047   |
| Bone-Meal. (Konig.) (x, 1891).....                                                            | 151    |
| And Thomas-Slag Phosphoric Acid, Comparative Values of. (Guntz.) (ix, 1890).....              | 523    |
| Composition of. (Macadam.) (vii, 1888).....                                                   | 82     |
| Constitution of. (Stocklusa.) (ix, 1890).....                                                 | 420    |
| Deprived of its Lime: Value of Phosphoric Acid in. (Heiden.) (viii, 1889).....                | 125    |
| Detection of Mineral Phosphates in. (Lorenz.) (viii, 1889).....                               | 307    |
| Examination of. (Hess.) (xii, 1893).....                                                      | 551    |
| Industry in Germany. (T.R.) (xii, 1893).....                                                  | 964    |
| Manufacture of. (Koenig.) (iii, 1884).....                                                    | 575    |

| Chloride, Infl. of, on Farm Plants. (Himorf.) (vii, 1888).....                                                     | 575  |
| Chloride Liquors, Utilisation of Residual. (P) Mond. (iii, 1884).....                                              | 259  |
| Chloride, Preparation of Chlorine or Hydrochloric Acid from. (P) Bramley. (vii, 1888).....                         | 437  |
| Chloride, Preparation of Hydrochloric Acid from. (Lunge.) (i, 1882).....                                           | 107  |
| Chloride, Process and Apparatus for Obtaining. (P) Higgs. (vi, 1887).....                                          | 599  |
| Chloride, Production of Chlorine and Hydrochloric Acid from. (P) Twynnan. (v, 1886).....                           | 32   |
| Chloride, Recovery of Potassium Chloride by Means of. (P) Koradooff. (i, 1882).....                                | 497  |
| Chloride, Solubility of Calcium Sulphate in. (Lunge.) (iv, 1885).....                                              | 31   |
| Chloride Solution, Results of adding, to Tartaric Acid Solution. (Grosjean.) (ii, 1883).....                       | 340  |
| Chloride Solution, Sp. Gr. of. (Pickering.) (xiii, 1894).....                                                      | 733  |
| Chloride Solutions, Electrolysis of. (Schoep.) (xiv, 1895).....                                                    | 864  |
| Chloride Solutions, Obtaining Magnesium Chloride from. (P) Cochrane and Bramley. (vi, 1887).....                   | 820  |
| Chloride Solutions, Solubility of Lime in. (Lunge.) (xi, 1892).....                                                | 882  |
| Chloride Tube, Substitute for. (Schmitz.) (iv, 1885).....                                                          | 368  |
| Chloride, Use of, in Determining Potash in Manure. (De Roede.) (xiv, 1895).....                                    | 511  |
| Chloride, Util. of Waste. (P) Richardson. (iv, 1885).....                                                          | 497  |
| Chloride, Utilising, in Manufacture of Chlorine. (P) Campbell and Boyd. (x, 1891).....                             | 640  |
| Chloride, Utilising Waste Liquors containing. (P) Webster. (v, 1886).....                                          | 35   |
| Chromate. <i>See under Lime, Chromate of.</i>                                                                      |      |
| Ethylate. (De Forcand.) (xiv, 1895).....                                                                           | 524  |
| Glyceroborate as an Antiseptic. (Le Bou.) (i, 1882).....                                                           | 379  |
| Glycerophosphate, Prep. of. (Lambotte.) (xiv, 1895).....                                                           | 1060 |
| Hydrate, Decomp. of Galactose by. (Sanda.) (xii, 1893).....                                                        | 940  |
| Hydrate, Precipitation of Clay by. (Leeds.) (x, 1891).....                                                         | 721  |
| Hydrate. <i>See also under Lime, Hydrate of.</i>                                                                   |      |
| Hydrosulphides. (Dyers and Shimidzu.) (iii, 1884).....                                                             | 481  |
| Hydroxide, Process and Apparatus for Manufacture of. (P) Pfeiffer. (vii, 1888).....                                | 323  |
| Hypochlorite, Conversion of, into Calcium Chlorate. (Lunge.) (iv, 1885).....                                       | 722  |
| Hypochlorite. (Lunge and Sehech.) (i, 1882).....                                                                   | 407  |
| In Thomas-Phosphate, Estim. of. (Holleman.) (xii, 1893).....                                                       | 376  |
| In Thomas-Slag &c., Estim. of. (Immerdorf.) (vi, 1887).....                                                        | 750  |
| Manufacture of. (P) Thompson. From Faure. (vii, 1888).....                                                         | 633  |
| Monocarbonate, Prod. of. (P) Mühlenbruch. (ix, 1890).....                                                          | 511  |
| Nitrate, Specific Gravity of. (Gerlach.) (v, 1886).....                                                            | 602  |
| Oxalate in Leaves. (Schimper.) (vii, 1888).....                                                                    | 575  |
| Oxide and Hydrate: Reaction with Hydrogen Sulphide. (Veley.) (iv, 1885).....                                       | 633  |
| Oxide in Quicklime, Determination of. (Stone and Schench.) (xiv, 1895).....                                        | 304  |
| Oxide, Solubility of. (Goldammer.) (v, 1886).....                                                                  | 450  |
| Oxychloride, Application of, for Recovery of Magnesium Oxhydrate. (P) United Chemical Works Co. (ii, 1883).....    | 177  |
| Oxychloride, Production of. (P) United Chemical Works Co. (ii, 1883).....                                          | 177  |
| Pernmanganate, Purif. of Water by. (Bordes.) (xiv, 1895).....                                                      | 1054 |
| Phosphate, Determ. of. (Coleman and Granger.) (xi, 1892).....                                                      | 328  |
| Phosphate, Estimation of Arsenic in Precipitated. (Fresenius.) (viii, 1889).....                                   | 62   |
| Phosphate, Preparation of Bi- and Tri-. (P) de Bonquet. (ii, 1884).....                                            | 526  |
| Phosphate, Production of, as a Beverage. (P) Williams and Symons. (x, 1891).....                                   | 571  |
| Phosphate, Recovery of Rich. (P) Scheibler. (v, 1886).....                                                         | 537  |
| Phosphate, Tetra-, and Basic Slaz. (Jensch.) (vi, 1887).....                                                       | 374  |
| Phosphates, Behaviour of Basic and Relation to Thomas-Slag. (Foerster.) (xi, 1892).....                            | 460  |
| Phosphates, Interaction of Ferrous Sulphate with. (Cazeneuve and Nicolle.) (xi, 1892).....                         | 1018 |
| Phosphates, Treatment of. (P) Justice. (iv, 1885).....                                                             | 355  |
| Plumbate, Application of. (Kassner.) (x, 1891).....                                                                | 160  |
| Plumbate, Employment of, in the Glass Industry. (Kassner.) (xiv, 1895).....                                        | 573  |
| Plumbate, Mannf. of Oxygen from. (Kassner.) (xiii, 1894).....                                                      | 415  |
| Polysulphide, Deposition of Sulphur Crystals from Solution of. (Holderman.) (vi, 1887).....                        | 596  |
| Qualitative Separation and Detection of. (Brownig.) (xii, 1893).....                                               | 63   |
| Quantitative Separation of Barium from. (Brownig.) (xi, 1892).....                                                 | 777  |
| Saccharate. (Stromeyer.) (vi, 1887).....                                                                           | 554  |
| Saccharate, Precipitation of. (Degener.) (ii, 1883).....                                                           | 289  |
| Saccharate, Preparation of. (v, 1886).....                                                                         | 453  |
| Salt of Boroglyceric Acid as an Antiseptic. (Le Bou.) (ii, 1883).....                                              | 91   |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | PAGE |

| Dioxide, Reduction of, by Carbon. (Naumann and Pistor.) (iv, 1885) .....                                 | 487  |
| Dioxide, Treatment of Thomas Slag with. (von Reis.) (vi, 1887) .....                                     | 967  |
| Dioxide, Utilisation of Waste, from Alcohol Manufacture. (Fawcitt.) (v, 1886) .....                      | 92   |
| Dioxide, Volumetric Determin. of. (Fuchs.) (viii, 1889) .....                                            | 736  |
| Displacement of, by Boron and Silicon. (Moissan.) (xiv, 1895) .....                                      | 367  |
| Disulphide and Calcium Sulphide, Reaction between. (Veley.) (iv, 1885) .....                             | 635  |
| Disulphide and Vaseline, Treating Vines with. (Cazenave.) (x, 1891) .....                                | 715  |
| Disulphide, Emulsive Power of Substances for Subdivision of. (P) Tazzetti and Berlese. (vii, 1888) ..... | 684  |
| Disulphide, for Treatment of Phylloxera. (Marion and Gastine.) (x, 1891) .....                           | 846  |
| Disulphide in Benzols and Naphthas, Estimation of. (Holland and Phillips.) (iii, 1884) .....             | 295  |
| Disulphide in Sulphocarbonates, Estimation of. (Muntz.) (ii, 1883) .....                                 | 428  |
| Disulphide, Inflammability of. (Popel.) (x, 1891) .....                                                  | 787  |
| Disulphide, Purification of. (Palmieri.) (ii, 1883) .....                                                | 245  |
| Disulphide. <i>See also under</i> Carbon Bisulphide.                                                     |      |
| Economical Production of Porous. (P) Ellis. (iv, 1885) .....                                             | 686  |
| Electrodes, Connections for. (P) Fret. (xii, 1893) .....                                                 | 932  |
| Extraction of Metals from. (P) Scott. (iv, 1885) .....                                                   | 223  |
| Fabrics, Manufacture of. (P) Williams. (iv, 1885) .....                                                  | 698  |
| Filaments, Connecting, with Conductors. (P) Lake. From Lamp. (viii, 1889) .....                          | 805  |
| Filaments for Electric Lighting: (P) Haddan. From Steel. (vi, 1887) .....                                | 379  |
| (P) Hughes and Chambers. (v, 1886) .....                                                                 | 615  |
| (P) Maxwell. (vi, 1887) .....                                                                            | 605  |
| Filaments for Incandescent Lamps, Material for. (P) Lake. From Crutts and Cie. (vii, 1888) .....         | 37   |
| For Compressing Sewage Sludge. (P) Leane. (v, 1886) .....                                                | 675  |
| For Electric Lamps, Manufacture of. (La Société à Chertemps et Cie.) (v, 1886) .....                     | 454  |
| For Electric Lamps, Preparation of Plastic. (P) Friedrichs. (ii, 1883) .....                             | 163  |
| For Electric Lighting, Prep. of. (Jacquelin.) (i, 1882) .....                                            | 141  |
| For Electrical and Filtering Purposes, Preparation of. (P) Coxeter and Nehmer. (iv, 1885) .....          | 363  |
| For Electrical Purposes: (P) Lake. From Girard and Street. (xiii, 1894) .....                            | 647  |
| (P) Niewerth. (xiii, 1894) .....                                                                         | 1206 |
| For Filtering and Decolorising. (P) Marshall. (vii, 1888) .....                                          | 132  |
| For Filtering, Manufacture of. (P) Brandenburg and Pott. (xiv, 1895) .....                               | 592  |
| For Filtering, Manufacture of Mineralised. (P) Gatehouse. (iv, 1885) .....                               | 240  |
| Free, in Coal Tar. (Kohler.) (viii, 1889) .....                                                          | 40   |
| From Soot, Prod. of Purified. (P) Pringle. (vi, 1887) .....                                              | 601  |
| In Cast Iron and Steel, Estimation of. (Zabudsky.) (iii, 1884) .....                                     | 35   |
| In Commercial Iron, Estim. of. (Koninck.) (vii, 1888) .....                                              | 603  |
| In Ferro-Carbon Alloys, Influence of Aluminium on. (Hogg.) (xiii, 1894) .....                            | 955  |
| In Iron and Steel. (Abel.) (iv, 1885) .....                                                              | 284  |
| In Iron and Steel, Determin. of. (Hempel.) (xiii, 1894) .....                                            | 421  |
| In Iron and Steel, Estimation of: (Lunge and Marchlewski.) (x, 1891) .....                               | 1033 |
| (Pettersson and Smith.) (ix, 1890) .....                                                                 | 897  |
| In Iron, Determination of: (Weissmann.) (vii, 1888) .....                                                | 646  |
| (Wiborgh.) (vi, 1887) .....                                                                              | 748  |
| In Iron, Estimation of: (Blum.) (vii, 1889) .....                                                        | 922  |
| (Koninck.) (vii, 1888) .....                                                                             | 457  |
| (Ledebur.) (xiii, 1894) .....                                                                            | 281  |
| In Iron, Methods of Estimating. (Gottig.) (xiii, 1894) .....                                             | 1036 |
| In Iron, Reliability of Methods of Determining. (Gottig.) (xiii, 1894) .....                             | 421  |
| In Iron, Volumetric Determin. of. (Wiborgh.) (vii, 1888) .....                                           | 235  |
| In Organic Substances, by Wet Method, Estimation of. (Messinger.) (ix, 1890) .....                       | 1069 |
| In Organic Sulphur Compounds, Estimation of. (Prunier.) (ix, 1890) .....                                 | 219  |
| In Steel. (Arnold and Read.) (xiii, 1894) .....                                                          | 710  |
| In Steel, Determination of: (Julian.) (xii, 1893) .....                                                  | 1061 |
| (Koch.) (xiii, 1894) .....                                                                               | 979  |
| Infl. of Aluminium on, in Alloys. (Hogg.) (xii, 1893) .....                                              | 239  |
| Manufacture of, and Apparatus therefor. (P) Jacquelin. (vi, 1887) .....                                  | 720  |
| Manufacture of Blocks, Plates, or Rods of. (P) Lake. From Shaw. (vi, 1887) .....                         | 223  |
| Manufacture of Sulphuret of, and Apparatus. (P) Baptiste-Regi and Folie-Desjardins. (v, 1886) .....      | 167  |
| Microscopic Examination of. (Wiesner.) (xi, 1892) .....                                                  | 1024 |
| Minerals, Analysis of. (Munsell.) (x, 1891) .....                                                        | 686  |
| Modifications of, in Iron. (Ledebur.) (xii, 1893) .....                                                  | 931  |
| Monoxide, Absorption of, by Blood. (Grehant.) (xi, 1892) .....                                           | 704  |
| Monoxide, Absorption of, by Cuprous Chloride. (Drehschmidt.) (vii, 1888) .....                           | 133  |
| Monoxide, Action of, on Iron. (Gantz.) (xi, 1892) .....                                                  | 909  |

| Particles in Smoke, Condensation of. (Irvine.) (viii, 1889, 377; (ix, 1890), 1110 .....                            | 1110 | Acid, Absorption of. (P) Müller. (xiii, 1894) .....                                                         | 152  |
| Perchloride, Action of Sulphur on. (Klason.) (xi, 1887) ..                                                         | 728  | Acid, Action of, on Glass. (Pfandler.) (iv, 1885) .....                                                     | 403  |
| Product from Paper Manuf. (P) Langville. (xi, 1892) ..                                                             | 935  | Acid, Action of, on Thomas Slag. (v, 1886) .....                                                            | 381  |
| Prod. of Chemically Pure. (P) Schmöle. (xiv, 1895) ..                                                              | 1060 | Acid, Action of, on Ultramarine Blue. (Buchner.) (vi, 1887) .....                                           | 507  |
| Production of Vegetable, for Hygienic and other Purposes. (P) Westerlund. (iv, 1885) .....                         | 134  | Acid and Hydrogen Gas, Manufacture of. (P) Pullman and Elworthy. (xii, 1893) .....                          | 43   |
| Rapid Determination of, in Steel. (P) Tropenas and Wells. (xi, 1892) .....                                         | 636  | Acid, Apparatus for Charging Liquids with. (P) Levinstein. (v, 1886) .....                                  | 36   |
| Reduction of Alumina by. (Moissan.) (xiv, 1895) .....                                                              | 370  | Acid, App. for Collecting, from Beer. (P) Inas. (x, 1891) ..                                                | 154  |
| Reduction of Metals by. (Hartley.) (x, 1891) .....                                                                 | 467  | Acid, Apparatus for Continuous Production of. (P) Capitaine. From Herbertz. (iv, 1885) .....                | 497  |
| Specific Heat and Boiling Point of. (Viole.) (xiv, 1895) ..                                                        | 897  | Acid, Apparatus for Determination of, in Carbonates. (Sidersky.) (vi, 1887) .....                           | 606  |
| Specific Heat of. (Chatelier.) (xii, 1893) .....                                                                   | 813  | Acid, Apparatus for Estimation of:                                                                          |      |
| State of, in Iron and Steel. (Ledebur.) (v, 1886) .....                                                            | 493  | (P) Muencke. (iii, 1884) .....                                                                              | 369  |
| Stead's Alkali Method for Estim. (Ridsdale.) (v, 1886) ..                                                          | 585  | (Ostersetzer.) (vii, 1884) .....                                                                            | 134  |
| Steels, Micrographic Analysis of. (Osmond.) (xiv, 1895) ..                                                         | 1062 | Acid, Apparatus for Impregnating Water with. (P) Shillito. From Rommenholler and Brunler. (vi, 1887) ..     | 663  |
| Stick for Are Lights. (P) Allison. From Ward. (x, 1891) ..                                                         | 555  | Acid, Apparatus for Manuf. of. (P) Farinaux. (vi, 1887) ..                                                  | 509  |
| Substitution in Groups linked to. (Matignon.) (xi, 1892) ..                                                        | 937  | Acid, Apparatus for Manufacture of Beverages charged with. (P) König. (xi, 1892) .....                      | 51   |
| Testing, Colour-Gauges for. (McMillan.) (xiii, 1894) ..                                                            | 978  | Acid, App. for Manuf. of Liquid. (P) Beins. (iv, 1885) ..                                                   | 344  |
| Tetrachloride. (Eckenroth.) (xi, 1892) .....                                                                       | 837  | Acid, Apparatus for Mixing Liquids with. (P) Brunler and Rommenholler. (vi, 1887) .....                     | 599  |
| Tetrachloride as a Solvent. (Eckenroth.) (xi, 1892) ..                                                             | 757  | Acid, App. for Mixing, with Beer. (P) Groth. (iv, 1885) ..                                                  | 58   |
| Tetrachloride for Separation of Ethyl Alcohol from Methylated Spirit. (Cari-Mantrand.) (xiv, 1895) .....           | 885  | Acid, Apparatus for Obtaining. (P) Müller. (xiii, 1894) ..                                                  | 636  |
| Tetrachloride for Separation of Methyl and Ethyl Alcohol. (Cari-Mantrand.) (xiv, 1895) .....                       | 986  | Acid, Apparatus for Preparation of Solid:                                                                   |      |
| Tetrachloride, Manuf. of. (P) Lever and Scott. (ix, 1890) ..                                                       | 1063 | (Cailliet.) (iv, 1885) .....                                                                                | 416  |
| Tetrachloride, Preparation of Phosgene from. (Erdmann.) (xiii, 1894) .....                                         | 65   | (Ducretat.) (iv, 1885) .....                                                                                | 210  |
| Tetrachloride, Prod. of. (P) Müller and Dubois. (xiii, 1894) ..                                                    | 972  | Acid, Apparatus for Using Liquid. (Brunler and Rommenholler.) (vi, 1887) .....                              | 662  |
| Tetrafluoride, Prep. and Properties of. (Moissan.) (ix, 1890) ..                                                   | 890  | Acid, Appliances for Collecting, during Fermentation. (P) Tiebbourne, Darley, and Purcell. (ix, 1890) ..... | 537  |
| Transformations of, in Tempering. (Charpy.) (xiii, 1894) ..                                                        | 1066 | Acid Baths and Tablets. (P) Sandow. (xi, 1892) .....                                                        | 37   |
| Treatment of Gas. (P) Snyder. (vi, 1887) .....                                                                     | 365  | Acid, Behaviour of Tricalcium Phosphate towards. (Georgievics.) (xi, 1892) .....                            | 254  |
| Vapour in Coal-Gas, Efficiency of. (Wright.) (xiv, 1895) ..                                                        | 103  | Acid, Collecting, during Fermentation. (P) Michel and Frank. (xii, 1894) .....                              | 655  |
| Carbons for Arc Lamps, Manufacture of:                                                                             |      | Acid, Continuous "First Saturation" avoiding Loss of. (Franc.) (xii, 1894) .....                            | 166  |
| (P) Redfern. From Braun. (xii, 1893) .....                                                                         | 162  | Acid Cylinders, Tests of. (Rudloff.) (xiv, 1895) .....                                                      | 640  |
| (P) Schroeder. (vii, 1888) .....                                                                                   | 572  | Acid, Decomposition of Alkali Aluminates by. (Ditte.) (xii, 1893) .....                                     | 675  |
| (P) Wise. From Grudelbueh. (xi, 1892) .....                                                                        | 754  | Acid, Decomposition of Chlorides by. (Schulz.) (i, 1882) ..                                                 | 500  |
| For Electric Lamps:                                                                                                |      | Acid, Determination of, in Air. (Lunge and Zeckendorf.) (vii, 1888) .....                                   | 639  |
| (P) Acheson. (xiii, 1894) .....                                                                                    | 1207 | Acid, Determination of, in Aqueous Solution. (Lunge and Mareblewski.) (x, 1891) .....                       | 1033 |
| (P) Evans and Wynne. (iv, 1885) .....                                                                              | 686  | Acid, Determ. of, in White Lead. (Mischel.) (xii, 1893) ..                                                  | 1060 |
| (P) Lister. (vi, 1887) .....                                                                                       | 379  | Acid Engine. (P) Wichmann. (ii, 1883) .....                                                                 | 263  |
| For Electric Lamps, Material for. (P) Wynne and Powell. (v, 1886) .....                                            | 172  | Acid, Estimation of. (Wolkowitz.) (xiii, 1894) .....                                                        | 904  |
| For Electrical Purposes, Manufacture of:                                                                           |      | Acid, Estimation of, in Beer. (Crampton and Trescott.) (vi, 1887) .....                                     | 839  |
| (P) Johnston. (vi, 1887) .....                                                                                     | 673  | Acid, Estimation of, in Carbonates, and Apparatus therefor. (P) Finkener. (ix, 1890) .....                  | 328  |
| (P) Kirby. (v, 1886) .....                                                                                         | 545  | Acid, Estimation of, in Sugar Fermentation. (vii, 1888) ..                                                  | 637  |
| For Electrodes. (P) Castner. (xiii, 1894) .....                                                                    | 1067 | Acid, Extraction of, from Carbonates. (P) Van Berkel. (xiii, 1894) .....                                    | 38   |
| Increasing Efficiency of Arc Light. (P) Garland. (xi, 1892) ..                                                     | 43   | Acid, Extraction of, from Minerals. (P) Knoop. (x, 1891) ..                                                 | 926  |

| Acid in Beer, Presence of. (Langer.) (ii, 1883) . . . . .                                                                                                 | 186      |
| Acid in Coal-Gas, Measurement of. (Wanklyn.) (iii, 1884) . . . . .                                                                                        | 13       |
| Acid, Influence of, on Fermentation and Keeping of Beer. (Delbrück.) (vi, 1887) . . . . .                                                                 | 734      |
| Acid, Influence of, on Keeping Bottled Beer. (Delbrück.) (vi, 1887) . . . . .                                                                             | 555      |
| Acid, Influence of Oxygen on Formation of. (Giltay and Abersen.) (xiv, 1895) . . . . .                                                                    | 764      |
| Acid, Liquid, under Regulated Pressure. (Zimmermann.) (ii, 1883) . . . . .                                                                                | 493      |
| Acid, Manufacture of:                                                                                                                                     |          |
| (P) Enquist. (xiii, 1894) . . . . .                                                                                                                       | 948      |
| (P) Mond and Hewitt. (vii, 1888) . . . . .                                                                                                                | 122      |
| (P) Raken. From Beins. (iv, 1885) . . . . .                                                                                                               | 416      |
| Acid, Manuf. of, and App. therefor. (P) Staub. (vii, 1888) . . . . .                                                                                      | 436      |
| Acid, Manufacture of, in Sugar Works. (vi, 1887) . . . . .                                                                                                | 602      |
| Acid, Manuf. of Solid. (P) Tiebhorne and others. (xi, 1892) . . . . .                                                                                     | 936      |
| Acid, Manufacture of Vanilloyl. (P) Imray. From La Société de Laire. (xi, 1892) . . . . .                                                                 | 1031     |
| Acid, Measuring Apparatus for Liquid. (P) Luhmann and Rommenholler. (v, 1886) . . . . .                                                                   | 326      |
| Acid, Obtaining, from Water-Gas. (P) Claus. (ix, 1890) . . . . .                                                                                          | 170      |
| Acid, Precipitation of Phenol by. (Lunge.) (ii, 1883) . . . . .                                                                                           | 165      |
| Acid Pressure App. (P) Browne. From Beck. (xiii, 1894) . . . . .                                                                                          | 788      |
| Acid, Production of:                                                                                                                                      |          |
| (P) Luhmann. (x, 1891) . . . . .                                                                                                                          | 769      |
| (P) Walker. (xii, 1893) . . . . .                                                                                                                         | 1030     |
| Acid, Production of Acid Derivatives of Alkyl Salts of Paramidophenol. (P) Newton. From The Farben-fabriken vernal F. Bayer and Co. (xiv, 1895) . . . . . | 769      |
| Acid, Prod. of Liquid, at Burgbrohl. (Heusler.) (ix, 1885) . . . . .                                                                                      | 743      |
| Acid, Production of Pure. (P) Lake. From Behnke and others. (xii, 1893) . . . . .                                                                         | 354      |
| Acid, Receptacles for Liquid. (P) Knoop. (vii, 1888) . . . . .                                                                                            | 835      |
| Acid, Recovery of, in Soda Manufacture. (P) Cheesbrough. From Hawliczek. (v, 1886) . . . . .                                                              | 428      |
| Acid, Separating, from Gases. (P) MacCallum. From Reissig and Landin. (x, 1891) . . . . .                                                                 | 628      |
| Acid, Separation of Carbonic Oxide from. (P) Gardner. From Henderson. (vii, 1888) . . . . .                                                               | 315      |
| Acid, Solution of Calcium Carbonate by. (Engel.) (v, 1886) . . . . .                                                                                      | 324      |
| Acid, Solution of Magnesium Carbonate by. (Engel.) (iv, 1885) . . . . .                                                                                   | 344      |
| Acid, Treatment of Sodium Bicarbonate to obtain. (P) Campbell and others. (x, 1891) . . . . .                                                             | 1006     |
| Acid, Use of Liquid, for Filtration of Liquids. (d'Arsonval.) (x, 1891) . . . . .                                                                         | 717      |
| Acid, Util. of Waste, in Breweries. (Maret.) (xii, 1894) . . . . .                                                                                        | 825      |
| Acid, Vessels for Transporting Liquids containing. (P) Nitykowski. (i, 1882) . . . . .                                                                    | 464      |

|                                                                                                                   | PAGE |

|--------------------------------------------------------------------------------------------------|----------|
| (P) Thompson. From Solvay. (v, 1886) .....                                                       | 451      |
| (P) Thompson. From Spilker and Loewe. (viii, 1889) .....                                         | 778      |
| (P) Wallis. (xii, 1893) .....                                                                    | 354, 833 |
| (P) Weldon. .... (i, 1882), 68, 68, 68, 69, (iii, 1884), 319, 482, 482; (iv, 1885), 212, 457     | 211      |
| (P) Wigs and Pratt. (iv, 1885) .....                                                             | 629      |
| Manufacture of, and Apparatus. (P) Bale. (vii, 1888) ..                                          | 1042     |
| Manufacture of, by Electrolysis. (P) Parker. (xii, 1893) ..                                      | 498      |
| Manuf. of, from Hydrochloric Acid. (P) Weldon. (iv, 1885) ..                                     | 42       |
| Manuf. of, from Metallic Ores. (P) Hunt. (xiv, 1895) ..                                          | 171      |
| Manufacture of, from Oxide of Magnesium. (Weldon.) (iv, 1885) ..                                 | 778      |
| Manufacture of, from Sodium and Potassium Chlorides. (P) Parker and Robinson. (viii, 1889) ..    | 286      |
| Manufacture of, Notes on. (Kinzett.) (vii, 1888) ..                                              | 960      |
| Methods for Production of. (T.R.) (xii, 1893) ..                                                 | 146      |
| Mond's Process for Manufacture of. (Quincke.) (xii, 1893) ..                                     | 380      |
| Nitric Acid Processes for Prod. of. (Davis.) (ix, 1890) ..                                       | 130      |
| Obtaining: (P) Donald. (ix, 1890) ..                                                             | 41       |
| (P) Spence and Watt. (ii, 1883) ..                                                               | 833      |
| (P) Vogt and Scott. (xii, 1893) ..                                                               | 189      |
| Obtaining, and Reverting By-Products therefrom. (P) Steadman and Kirkpatrick. (ix, 1890) ..      | 61       |
| Obtaining, from Ammonium Chloride. (P) Mond. (vi, 1887), 289; (vii, 1888), 626; (xii, 1893), 925 | 861      |
| Obtaining, from Ammonium Chloride, and Apparatus therefor. (P) Bale. (ix, 1890) ..               | 201      |
| Obtaining, from Ammonium Chloride and from Hydrochloric Acid. (P) Mond. (ix, 1890) ..            | 706      |
| Obtaining, from Hydrochloric Acid: (P) Campbell and Boyd. (viii, 1889) ..                        | 367      |
| (P) Harzroaves and others. (vi, 1887) ..                                                         | 457, 458 |
| Obtaining, from Magnesium Chloride. (P) Weldon. (iv, 1885) ..                                    | 440      |
| Obtainment of: (P) Mond. (vi, 1887) ..                                                           | 947      |
| (P) Peniakoff. (xii, 1894) ..                                                                    | 437      |
| Or Hydrochloric Acid, from Chloride of Calcium. (P) Bramley. (vii, 1888) ..                      | 193      |
| Or Hydrochloric Acid, Production of. (P) Clark. From Darguin. (viii, 1889) ..                    | 463, 463 |
| Preparation of: (P) Davis. (x, 1891) ..                                                          | 594      |
| (P) Taylor. (iv, 1885) ..                                                                        | 1128     |
| Process, The De Wilde-Reychler. (ix, 1890) ..                                                    | 461      |
| (Jurisch.) (x, 1891) ..                                                                          | 682      |
| Production of. (xi, 1892) ..                                                                     | 925      |
| (Blattner and Kestner.) (xii, 1893) ..                                                           | 640      |
| (P) Campbell and Boyd. (x, 1891) ..                                                              | 353      |
| (Closson.) (i, 1882) ..                                                                          | 887      |
| (P) Drake. (xiii, 1894) ..                                                                       | 46       |
| (P) Jnst. (viii, 1889) ..                                                                        | 238      |
| (P) Kolb. (xi, 1892) ..                                                                          | 644      |
| (P) Lyte. (P) (x, 1891), 1006; (xi, 1892), 433; (xii, 1893), 155, 155; (xiii, 1894) ..           | 379      |
| (P) Mills. From Verein für Chemische Industrie. (v, 1886) ..                                     | 189      |
| (P) Parker and Robinson. (ix, 1890) ..                                                           | 767      |
| (P) Raymond. (x, 1891) ..                                                                        | 156      |
| Production of, by Electrolysis: (P) Fauré. (xii, 1893) ..                                        | 65       |
| (Hempel.) (ix, 1890) ..                                                                          | 755      |
| (P) Kellner. (xi, 1892) ..                                                                       | 276      |
| (P) Parker and Robinson. (xii, 1893) ..                                                          | 831      |
| Production of, by Manganese Ore and Nitric Acid. (Lange and Pret.) (xi, 1893) ..                 | 865      |
| Production of, from Gaseous HCl: (P) Krause. (xiv, 1895) ..                                      | 510      |
| (P) De Wilde and Reychler. (ix, 1890) ..                                                         | 822      |
| (P) Donald. (vi, 1887) ..                                                                        | 272      |
| Production of HCl from. (P) Lorenz. (xiv, 1895) ..                                               | 599      |
| Production of Liquid. (P) Vantin. (vi, 1887) ..                                                  | 103      |
| Prospects of Manufacture of. (Hurter.) (ii, 1885) ..                                             | 454      |
| Purifying Hydrochloric Acid for Manufacture of. (P) Wigs. (i, 1882) ..                           | 91       |
| Rate of Loss of, in Bleaching Powder. (Pattinson.) (v, 1886), 387; (vi, 1887) ..                 | 654      |
| Reagent for Free, in Hydrochloric Acid. (Le Roy.) (ix, 1890) ..                                  | 189      |
| Reverting By-Products formed in Obtaining. (P) Steadman and Kirkpatrick. (ix, 1890) ..           | 1128     |
| Recovery of, from Residual Liquors. (P) Lyte and Tatters. (ix, 1890) ..                          | 831      |
| Re-forming Manganese Peroxide to Obtain. (P) Campbell and Boyd. (xii, 1893) ..                   | 536      |
| Residues, Apparatus for Treatment of. (P) Wigs and others. (v, 1885) ..                          | 673      |
| Separation of, from Gas Mixtures. (P) Heinzerling. (vii, 1888) ..                                | 788      |
| Separation of Iodine from. (Macnair.) (xii, 1893) ..                                             | 308      |
| Stills, Estimation of Acid in Residual Liquor of. (Hart.) (i, 1882) ..                           | 204      |
| Substitution of the Amido Group by. (Sandmeyer.) (iv, 1885) ..                                   | 867      |
| Titration of Alkaline Liquids containing. (Ullmann.) (xii, 1893) ..                              | 308      |
| Use of Sodium Peroxide in Estimation of. (Edinger.) (xiv, 1895) ..                               | 567      |
| Water. (viii, 1889) ..                                                                           | 775      |
| Weldon's Process for Manufacture of, from Magnesium Chloride. (Dewar.) (vi, 1887) ..             |          |

| Acid, Preparation of. (P) Plaet and Bonnet. (xiii, 1894).....                                               | 37       | Phosphate as a Green Pigment. (Carnot.) (i, 1882).....                                        | 315      |
| Acid, Production of, from Battery Solutions. (P) Fitzgerald. (vi, 1887).....                                | 515      | Phosphate, Use of, in Chemical Analysis. (Carnot.) (i, 1882).....                             | 224      |
| Acid with Aniline, Compound of. (Girard and L'Hôte.) (vi, 1887).....                                        | 659      | Pigments, Changes in. (x, 1892).....                                                          | 345      |
| And Stannic Oxides, Compounds of. (Leykauf.) (xi, 1892).....                                                | 748      | Pigments, Comp. and Manuf. of. (Weber.) (x, 1891).....                                        | 709      |
| Chloride, Method of Making. (Vosmaer.) (viii, 1889).....                                                    | 569      | Preparation of. (Glatzel.) (x, 1891).....                                                     | 141      |
| Compounds, Manufacture of. (P) Thomas. (iv, 1885).....                                                      | 224      | Production of:                                                                                |          |
| Oxide, Action of Heat on Salts of. (Reconra.) (x, 1891).....                                                | 925      | (P) Park. (vii, 1888).....                                                                    | 754      |
| Oxide, Discharge for Dyes Mordanted with. (Schmid.) (x, 1891).....                                          | 134      | (P) Sternberg and Deutsch. (xii, 1893).....                                                   | 845      |
| Sulphate, Isomeric States of. (Reccura.) (xi, 1892).....                                                    | 600      | Saccharate. (Stromeyer.) (vi, 1887).....                                                      | 554      |
| Chromes. (Von Perger.) (xii, 1893).....                                                                     | 38       | Salts, Tanning by Chromates and. (P) Heinzerling. (i, 1882).....                              | 28       |
| Chroming, Theory of. (Knecht.) (ix, 1890).....                                                              | 59       | Separation of, from Iron and Aluminium. (Marchal and Wiernick.) (x, 1891).....                | 1034     |
| Chromite, Analysis of. (Waller and Vullé.) (xii, 1893).....                                                 | 625      | Ternary Alloys of Iron with. (De Benneville.) (xiv, 1895).....                                | 578      |
| Chromium, Action of Iron Sulphide on. (xiii, 1894).....                                                     | 1063     | Trioxide, Manufacture of. (P) Rowell. (iv, 1885).....                                         | 594      |
| Alzinate. (Stanford.) (v, 1886).....                                                                        | 230      | Chromometer for Comparison of Tints. (Ridsdale.) (vii, 1888).....                             | 70       |
| Alizarin Compounds. (Liechti and Suida.) (v, 1886).....                                                     | 524      | Chronograph for Timing Explosives. (Le Boulengé.) (viii, 1889).....                           | 60       |
| Alloys, Electro-plating. (P) Slater. (iv, 1885).....                                                        | 351      | Chrysamin as a Mordant. (Galland.) (v, 1886).....                                             | 532      |
| Alloys, Manufacture of. (P) Slater. (iv, 1885).....                                                         | 287      | Chrysaniine:                                                                                  |          |
| Aluminium and Iron, Basic Sulphocyanides of. (P) Hanff. (vii, 1888).....                                    | 207      | (Anschütz.) (iii, 1884).....                                                                  | 242      |
| And Iron Alizarates. (Jacobi and Suida.) (v, 1886).....                                                     | 523      | (Fischer and Körner.) (iii, 1881).....                                                        | 164      |
| And Iron, Alloys of. (Osmond and Hadfield.) (xi, 1892).....                                                 | 910      | Azo-Comp. from. (Trillat and de Raczowski.) (xi, 1892).....                                   | 737      |
| And Iron, Manufacture of Alloys of. (P) Guetati and Chavanne. (i, 1882).....                                | 154      | Derivatives of. (Trillat and de Raczowski.) (xi, 1892).....                                   | 997      |
| And its Alloys, Manufacture of. (P) Groth. From Rouff. (vii, 1888).....                                     | 753      | Chrysarobin, Therapeutic Substitutes for. (Liebermann.) (vii, 1888).....                      | 205      |
| And its Alloys, Obtaining. (P) Eaton and Vanderbilt. (ix, 1890).....                                        | 811      | Chrysene:                                                                                     |          |
| And Manganese, Preparation of Double Cyanides of. (Christensen.) (iv, 1885).....                            | 401      | (Bamberger and Chattaway.) (xiii, 1894).....                                                  | 27       |
| Behaviour of some Salts of. (Liechti and Schwitzer.) (iv, 1885).....                                        | 586      | (Bamberger and Kranzfeld.) (iv, 1885).....                                                    | 583      |
| Blue, Artificial Production of. (Garnier.) (x, 1891).....                                                   | 367      | Amido-. (Abegg.) (ix, 1890).....                                                              | 600      |
| Carbide, Production of. (Mühlhäuser.) (xiii, 1894).....                                                     | 35       | Hydrides. (Liebermann and Spiegel.) (viii, 1889).....                                         | 274      |
|                                                                                                             |          | Synthesis of. (Kraemer and Spilker.) (ix, 1890).....                                          | 275      |
